Program of Studies

Graduation Requirements

A student must accumulate twenty-three credits in grades 9 through 12 in order to qualify for a Williamsport Area High School diploma. Among these are required credits in the areas of English, Social Studies, Mathematics, Science, Health & Physical Education, and the Arts and Humanities. Graduation requirements apply to all students unless determined otherwise by an IEP team in compliance with the Individuals with Disabilities Education Act (IDEA).

STANDARD GRADUATION REQUIREMENTS			
Subject Area	Required # of Courses		
English	4.0 (1 course per year)		
Mathematics	4.0* (1 course per year)		
Science	3.0/4.0** (1 course per year)		
Social Studies	3.0/4.0** (1 course per year)		
Physical Education/Health	1.5		
Arts and Humanities	2.0		
Electives	4.5		

^{*}Any student that completes Calculus I by their Junior year has officially completed their high school math requirements.

^{**}Students have a choice of a swing credit. They have the ability to choose a 4th course of science or social studies, their senior year, to fulfill graduation requirements.

CAREER & TECHNICAL EDUCATION PROGRAM COMPLETER GRADUATION			
REQUIREMENTS			
Subject Area	Required # of Courses		
English	4.0 (1 course per year)		
Mathematics 4.0* (1 course per year)			
Science 3.0 (1 course per year)			
Social Studies 3.0 (1 course per year)			
Physical Education/Health 1.5			
Arts and Humanities 2.0			
Electives 4.5			

^{*}Any student that completes Calculus I by their Junior year has officially completed their high school math requirements.

Approved WASD Grade Scale (Grades 7-12)

(Effective 2018-19)

A	90-100
В	80-89
С	70-79
D	65-69
E	<64.99

4.0 Scale Conversion

Colleges report GPA (grade point average) on a 4.0 scale. The top grade is an A, which equals 4.0. This is the standard scale at most colleges, and many high schools use it. To convert your GPA to a 4.0 scale:

Letter Grade	Percent Grade	4.0 Scale
A+	97-100	4.0
A	93-96	4.0
A-	90-92	3.7
B+	87-89	3.3
В	83-86	3.0
В-	80-82	2.7
C+	77-79	2.3
С	73-76	2.0
C-	70-72	1.7
D+	67-69	1.3

Letter Grade	Percent Grade	4.0 Scale
D	65-66	1.0
E/F	Below 65	0.0

Honor Roll - In order to recognize superior academic achievement – Grades of 95% in all subject areas will be Distinguished Honor Roll, grades of 90% in all subject areas will be High Honor Roll, and grades of 85% in all subject areas will be Honor Roll.

Students at –risk of failure: Presently, students failing a course within a marking period are assigned a "55" to allow them to recover the failing grade in subsequent marking periods.

KEYSTONE EXAM

Graduation Requirements

The Commonwealth of Pennsylvania has mandated requirements as part of Act 158 of 2018 above and beyond the district's prescribed 23 credits for graduation from the high school.

Students are required to take the Keystone Exams in the areas of Algebra, Biology and Literature for purposes of federal accountability.

- Completing the required Keystone Exams, and fulfilling each additional condition that results from the student's performance rating on the Keystone Exams, as detailed below. Each student, at some point, must sit for all components of the state assessment. Individual scores for these assessments are returned shortly after exam is completed. For each of these assessments, there are four possible ratings: Advanced, Proficient, Basic and Below Basic. Each rating has an impact on the student in terms of what happens as a result of that level of achievement.
 - A student who achieves an Advanced or Proficient rating on the required elements of the Keystone Exams shall be eligible to graduate with no additional conditions, provided the 23 credit requirement has also been met.
 - A student who achieves a Basic or Below Basic rating on the required elements of the Keystone Exams will have to complete the Keystone retest in the content areas where scores of Basic or Below Basic were earned. If a student does not achieve proficiency on all three Keystone Exams then an alternative pathway may need to be applied such as: Keystone Composite Pathway, Alternate Assessment Pathway, Evidence Based Pathway, or CTE Pathway.

College Entrance Requirements

Every student should be concerned not only with meeting graduation requirements, but with meeting college and other post-high school education requirements as well. There is a wide variation in the requirements for college admission. The usual college preparation course, however, will include sixteen units of subjects in the fields of English, World Languages, Social Studies, Science and Mathematics. A college preparatory program should include four college preparatory subjects each year. The highly competitive admissions offices are selecting students who elect the most challenging courses available. Students interested in the highly competitive colleges and universities are encouraged to take the Honors level courses whenever it is possible. The following distribution will satisfy even the most competitive colleges:

English	4
Mathematics (includes	3 to 4
algebra, geometry, and	
trigonometry)	
Languages	2 to 3
Science	3 to 4
Social Studies	3 to 4
Additional units in	2
any of the fields above	
Total academic units	20
Electives, preferably	2
in fields other than	
those listed above	
Total units	23

To be on the safe side, we strongly urge you to consult the college catalogs for admission information. Contact your counselor about course selection decisions or have some doubts about the decisions you have made. The above information reflects recommended minimum requirements for those who wish training beyond high school. This information was taken from a national publication and should not be confused with Williamsport Area High School graduation requirements. A separate WAHS publication, The College Planning Guide, is available in the counseling offices.

PC Now Dual Enrollment Program

Pennsylvania College of Technology has provided WAHS the opportunity to be enrolled in numerous college level classes for college and high school credit. These course are provided free of charge. Students must enroll at Penn College, and then pass the required entrance

exams for the desired course. WAHS will have a process in place for enrollment and testing. These exams vary per course. Failure to pass the required exams may result in the student being placed into a non-PCT course.

Advanced Placement Courses

Taking AP courses and exams can help students:

- Stand out on college applications. AP courses on a student's transcript shows that they've challenged themselves with the most rigorous courses available to them. And success on an AP Exam shows that they're ready for collegelevel coursework.
- Earn college credit and/or skip introductory courses in college. Most four-year colleges and universities in the United States—as well as many institutions in more than 100 other countries—grant students credit, placement, or both for qualifying AP Exam scores.
- Each AP course concludes with an AP Exam. These assessments are designed by the same expert committee that designed the course. Students are expected to take the AP Exam for the course.
- The exams are scored on a scale of 1 to 5 by college and university professors and experienced AP teachers. Many U.S. colleges offer credit for AP Exam scores of 3 or higher.
- All students who are willing and academically prepared to accept the challenge of a rigorous academic curriculum should be considered for admission to AP courses.

Minimum Promotion Requirements

9th to 10th	10th to 11th	11th to 12th	12th to		
Grade	Grade	Grade	Graduate		
Successfully Acquire at least 5 credits	Successfully Acquire at least 10 credits	Successfully Acquire at least 15 credits	Acquire at least 23 credits as outlined by WAHS graduation requirements		

^{*} Please realize these are only minimum needed credits to move on to the next grade level. **This**

is not recommended. Students should work to attain all credits each year.

Commencement Participation

Each member of the senior class is eligible to process on the evening of Commencement only if the student has sufficient credits to qualify for a diploma by the end of the summer session immediately following the senior year. This means that students lacking more than one (1) credit will not be permitted to process on the evening of Commencement. Remember, twentythree (23) credits (to include required credits in certain areas) must be accumulated in order to qualify for a Williamsport Area High School diploma. If there is any uncertainty regarding your credit status, please contact the appropriate school counselor at your earliest convenience. All students expecting a diploma must also have performed on the Keystone Exam's as described earlier in this handbook.

Early Graduation Requirements for Graduation after the Junior Year:

- 1. A written request initiated by the student and signed by both student and parent must be made on or before the first day of March of the year prior to that of requested graduation (March of sophomore year).
- 2. The written request must be submitted to and be approved by the head principal.
- 3. A student must have earned a minimum of 23 credits and completed all required courses and have maintained an overall cumulative average of 85 percent or higher in the freshman, sophomore and junior years.
- 4. The student must show proficiency on their Keystone Exam's by the end of the junior year. Failure to do so will nullify early graduation opportunity.

Delayed Graduation

A student who fails to meet the requirements for graduation from Williamsport Area High School when scheduled may later qualify for his/her diploma under the following conditions:

1. Complete the required make-up in summer school during the summer immediately following the senior year. A maximum of one credit may be completed in summer school.

2. Complete the required make-up in an approved credit recovery program.

Honor Roll

The policy calls for a three-part honor roll structure, which recognizes student achievement on an equal footing at every level of course undertaken. Students would attain "Honor Roll" status during a marking period by earning grades of 85 or higher in every course undertaken; "High Honor Roll" status would come to students earning grades of 90 or better in every course undertaken; "Distinguished Honor Roll" status is earned by those students with a 95 or better in every course during the

marking period. The thresholds cited here are for individual course grades each marking period, and not cumulative course averages over more than one marking period. Any grade below 85 in these areas would disqualify a student from honor roll consideration, regardless of the rest of his or her grades.

Career Pathways

In the following sections you will see career pathway clusters. Once you identify an area of interest you should utilize the table to identify courses that will best prepare you for a job-ready or post-secondary future. Please make sure you closely look at the areas, focusing on an area of interest and concentrating on it will help to give you the best potential for future success in the field you desire.

WAHS CAREER COURSE PLANNING GUIDES

Over the next few pages you will have the opportunity to see a number of different career pathways that are available within society for students. These pathways are in the areas of:

Arts & Communication
Business & IT
Human Services
Industrial Technology
Science, Technology, Engineering & Math (STEM)

Each one of these pathways has specific programs designed for students based on some of their possible career or post-secondary plans. Please make sure you look at these educational plans closely so you can help us to set up your child for the best chance at future success whether it be at a job or pursuing higher education.

WAHS CAREER CLUSTERS

PATH	CLUSTER	DESCRIPTION	PATHWAYS
ARTS & COMMUNICATION PATHWAY	1 – Advertising and Commercial Art (CTE Program) 2-Visual Arts 3-Performing Arts/Drama 4-Performing Arts/Music	Designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and entertainment services. Business Pathway

This pathway is designed to prepare students in the world of business, finance and information services.

Pathways Focus Areas

Marketing & Sales Finance Information Technology Business Management Are you interested in ... Can you... Do you enjoy... Work easily with Owning your own business Meeting with groups Making budgets others? Organize your A business Organizing a project Planning an time efficiently? event Working with technology environment Work with statistics? Selling products and services Processing Office management Sales Use computers and other numbers and figures Following directions Computers and technology technology? Learning new software programs Presentations to groups Pay attention to details Telecommunications Solve problems? Advertising Work Independently? Different work sites Show initiative?

If you answered "yes" to most of these questions, you might consider a future in one of the same occupations listed below based on their level of post-secondary training.

Work on a team?

Insurance

Record keeping

Sample Careers

	1	
Entry (OJT)	Technical/Skilled (1-3 yrs)	Professional (4 + yrs)
Customer Service Representative	Computer	Marketing Manager
Reservation/Travel Agent	Salesperson Retail	Auditors
Telemarketer	Buyer	Certified Public Accountant Economist
Book Keeper	Bank Collection	Financial Planner
Cashier	Officer	Tax Examiner
Payroll Clerk	Tax Preparer	E-Commerce Analyst Operations
Title Searcher	Claims Adjuster	Analyst Systems Analyst
Computer Operator	Software Engineer	Hospital Administrator
Accounts payable clerk	Computer Programmer	Human Resources Manager
Administrative Assistant	Production Support	Chief Executive Officer
Bank Teller	Analyst Desktop	Manufacturing Sales Representative
File Clerk	Publisher	Bank President
Retail Sales Clerk	Legal Secretary	
School Secretary	Medical Secretary	
	Paralegal	
	Real Estate Agent	
	Restaurant Manager	
	Sales Representative	

Business Pathway- Business Administration

Possible Careers: Administrative Assistant, Banking, Marketing, Management, and Sales

Human Services (HS) Pathway

This pathway is designed to cultivate students' interests skills and experiences for employment in careers related to family and human needs.

Pathways Focus Areas

Counseling, Personal Care, Health

Education

Law, Public Safety and Government

Hospitality and Tourism

Are you interested in ...

Owning your own Business Family and social services Working with people Aging adults Child development Food preparation Teaching Counseling

Can you...

Plan budgets

Apply science and math to the real world Organize well Plan and direct programs Be creative Communicate well Assume leadership Work with a team Use interpersonal skills Be conscientious and dependable

Do you enjoy...

Communicate services Helping and protecting others Working with people Counseling and advising people Serving others' needs Interviewing people Selling products or services Handling customer complaints Searching for answers to human Problems

If you answered "yes" to most of these questions, you might consider a future in one of the same occupations listed below based on their level of post-secondary training.

Sample Careers

Entry (OJT)

Patient Care Technician Dialysis Technician Home Health Aide Physical Therapy Aide Animal Caretaker **Extension Services Worker** Child Care Home Health Aide Library Assistant Armed Services Career Bailiff Postal Services Worker Security Guard Utility Worker Aerobics Instructor Travel Agent

Technical/Skilled (1-3 yrs)

Certified Nursing Assistant Pharmacy Assistant Barber Cosmetologist Designer Manicurist Massage Therapist Mortician Truck Driver Teacher's Aid Armed Services Career Crime Laboratory Technician

Medical Laboratory Technician Fire Fighter Flight Attendant Surgical Technologist Personal Trainer Licensed Practical Nurse (LPN)

Dental Hygienist Occupational Therapy Assistant

Industrial Technology (IT) Pathway

This pathway is designed to cultivate students' interests in the life, physical and behavioral sciences.

Pathways Focus Areas

Architecture & Construction

Manufacturing & Engineering

Transportation

Are you interested in ...

Tools, equipment and materials Buildings and construction Woodworking Nature and Plants Math & Science classes

Precision work

Design and architecture

Engineering

Computer technology Production management

How things work

Can you...

Apply science and math to real world Read and understand directions Solve problems of a complex nature Understand directives and read maps Organize reports and people See a task through to completion Use a computer

Do you enjoy...

Travel

Working with your hands

Design/working with project, models,

prototypes

Working Outdoors

Working with plants and nature

Working in a lab setting Working on a team Building with your

hands

Operating tools and equipment Paying close attention to details

If you answered "yes" to most of these questions, you might consider a future in one of the same occupations listed below based on their level of post-secondary training.

Sample Careers

Entry (OJT)

Drywall worker

Roofer

Machine Operator Freight Handler

Laborer

Warehouse Worker

Florist Farming

Apprenticeships

Brick Mason
Carpenter
Welder
Electrician

Science, Technology, Engineering, Mathematics (STEM) **Pathway**

This pathway is designed to cultivate students' interests in the life, physical and behavioral sciences.

Pathways Focus Areas

Science, Technology and Math

Agriculture, Food and Natural Resources

Are you interested in ...

Science and medicine Medical research

Environment and conservation

Pharmacy Engineering Physical therapy Sports/fitness Information systems Conservation

Can you...

Pay attention to detail Use a computer and technology Work in a lab setting or medical facility Apply a scientific theory to real life problems

Work outdoors around animals and

Collect and analyze data from experiments

Work with people in need

Work with science and math theories

Do you enjoy...

Diagnosing and caring for sick animals Working outdoors with wildlife

Solving problems

Working on cutting-edge scientific research

Working on a team Medical lab research

Making a contribution to society

Working with numbers

Developing conclusion from a database

If you answered "yes" to most of these questions, you might consider a future in one of the same occupations listed below based on their level of post-secondary training.

Sample Careers

Entry (OJT)

Radiology

Animal Caretaker **Extension Services Worker** Farm Manager Food Conservation Worker

Zoo Caretaker Hazardous Waste Technician

Optician

CLASS RANK

Class rank is a procedure by which the quality of a student's work is compared with that of his classmates. It is usually expressed as a fraction. For example, a class rank of 12/450 means that this student is twelfth from the top in a class of 450. At WAHS, class rank is calculated by using a formula which recognizes achievement, challenge and course load.

Achievement is determined by the final grade earned in each course. Challenge is determined by the "difficulty factor," a value assigned to each course to indicate its academic demands. The difficulty factor ranges from a high of 1.4 for Honors/1.45AP courses to 1.0 for those courses that are less demanding academically. Difficulty factors may be found in the listing of course titles, beginning on page 37. Course load is the total of all credits (courses), including summer school courses, attempted by the student.

A student may improve his class rank by improving his grades, by choosing courses with higher difficulty factors, or by taking more courses. Class rank is calculated at the end of each marking period, and is cumulative, that is, it includes all work done by the student since his entry into high school. Work completed in eighth grade does not count in the calculation of the WAHS class rank. Most colleges require class rank as a part of the admissions process.

WAHS Credit-Bearing Opportunities and their Impact on Class Rank and GPA (November 15, 2005)

Type of Program or Opportunity	Fulfills Graduation	Used to Calculate GPA and Class Rank	Other Notes
	Requirement	anu Ciass Nank	
Any Dual Enrollment Coursework Early or Middle College Coursework, whether taken for enrichment or to fulfill a Graduation Requirement	Yes	Yes (see Letter Grade Conversion Table)	
Approved College Course (or college- provided high school course) required for Graduation	Yes	Yes	Student attends the post-secondary experience on school time during the school year. Student/parent responsible for all costs incurred. The course undertaken is not part of our Dual Enrollment catalog.
Unapproved College Course (or college- provided high school course) taken for Enrichment, not to fulfill Graduation Requirement	No	No	Student/parent responsible for all costs incurred. Course is not part of the WAHS transcript, but will be a matter of record with the post-secondary institute, and would become part of their transcription process
Approved On-line Course to Satisfy Graduation Requirement.	Yes	Yes (see Letter Grade Conversion Table)	Student/parent responsible for all costs incurred. Potential remedy for schedule conflicts. WAHS must offer the course undertaken or its close equivalent in the course catalog. Course will appear as a WAHS transcript record.
Approved College-level Coursework taken either "live" at a college or on-line through an approved post-secondary provider because the student has "max-ed out" a WAHS curriculum through academic acceleration	Yes	Yes (see Letter Grade Conversion Table)	WASD is responsible for tuition only
Any high school level coursework undertaken at a middle school setting	Yes	No	
Any high school level coursework undertaken at the high school setting prior to 9th grade	Yes	No	
Approved Blended Schools Recovery, Edgenuity learning, Coursework	Yes	Yes	Student/parent responsible for all costs incurred for credit-recovery coursework.
Approved Blended Schools, Edgenuity learning Grade-level Coursework	Yes	Yes	WASD is responsible for costs associated with this type of specialized, approved coursework.

NCAA COURSE REGULATIONS

Attention student athletes and parents: If participation in college athletics is a possible future consideration, it is important for you to read and understand the following information. If you have any questions about the academic standards, you should contact a high school counselor or call the NCAA eligibility hotline at (877) 262-1492.

In order to participate as a college freshman in Division I or II athletics, the NCAA Initial-Eligibility Clearinghouse must certify a student. Although a student does not begin the certification process before the end of the junior year in high school, he/she begins to meet the eligibility requirements in ninth grade with the courses selected and the grades achieved. Thus, course selection is extremely important.

To be certified by the Clearinghouse, you must:

- 1. Graduate from high school.
- 2. Division I: The minimum grade-point average in the 16 core courses and required ACT or SAT score vary according to the Initial-Eligibility Index. (See your high school counselor for more information) The minimum grade point average is based on a core curriculum from at least 16 academic courses, which were successfully completed during grades nine (9) through twelve (12). Only courses that satisfy the NCAA definition of a core course can be used to calculate the NCAA GPA. Williamsport Area High School courses meeting these requirements are listed on the next page. The following chart shows what core courses must be included at a minimum.
- 3. Division II: Earn a grade-point average of at least a 2.0 from a core curriculum in at least 14 academic courses which were successfully completed during grades nine (9) through twelve (12). Only courses that satisfy the NCAA definition of a core course can be used to calculate the NCAA GPA. Williamsport Area High School courses meeting these requirements are listed throughout the catalog. The following chart shows what core courses must be included at a minimum.

NOTE: Must earn an ACT sum score of 68 or combined score, math & verbal of at least 820 on the SAT on a national test date.

	Division I	<u>Division II</u>
English Core	4 years	3 years
Math Core (yr. of algebra <i>and</i> yr. of geometry)	3 years	2 years
Science Core (1 year with lab)	2 years	2 years
Social Studies Core	2 years	2 years
Additional Core courses from English, Math, or Science	1 year	2 years
Additional academic (Core) courses in any of the above (English, Math, Science, Social Studies) or world language, computer science, philosophy or non-doctrinal religion	4 years	3 years
TOTAL CORE UNITS REQUIRED	16	14

Course Change Process

Circumstances under which a course change request might be granted once the school year begins are limited to:

- Lack of prerequisite or necessary academic requirement
- Scheduled for a course that has already been passed
- Scheduled for a repeated course with the same teacher (change must be made within the first week of school)
- Addendum to IEP
- Seniors meeting "Life Experiences" criteria within the one-week window to do so
- Students wishing to enrich their schedule, provided eligibility requirements are met
- Any accelerated student in 8th grade from one of the district's middle schools undertaking a WHS course at the high school may drop the course and return to his/her middle school upon written parental request, and notification of the middle school principal involved.

Circumstances for a course to be considered for drop/add:

- teacher recommendation
- misplacement or prerequisite not met
- student seeks more challenging curricula

Process to complete a course change:

- 1. Student meets with the school counselor about the course and reviews the circumstances for a proposed course change
 - o Identify the root cause of the problem that triggers the change request
 - Counselor gathers input from teachers impacted by proposed change before making final recommendation to administration
- 2. When students are opting out of higher-level courses, check that scaffolds/supports are provided prior to making a schedule change
- 3. Teacher/guidance contact parent for input on change written note of a parent/guardian giving consent is required in order to initiate any change. Both Teachers (Dropped and Added) must sign and agree with change. If there is a disagreement the matter must be resolved or the request is denied.
- 4. Principal must approve or deny request. This will be based on teacher and counselor feedback. If necessary there may need to be further clarification concerning request.
- 5. Unless there is a unique circumstance that involves the wellbeing/safety of a student, course changes must be completed before interim progress reports of the first quarter of the course.
- 6. Waiting Period: After a student has met with their guidance counselor, there will be a two-day waiting period before a change will be made in order to contact all the necessary individuals. When possible the student will observe the course to which they are being added.

Parental consent must be obtained in order to initiate the course change process. Provision of consent does not guarantee that the request will ultimately be granted

The information, on the following pages, serves to describe each of the courses offered at the high school and, where appropriate, additional pertinent facts have been listed on a subject-by-subject basis.

The difficulty factor (D.F.) is a value assigned to each course to indicate its academic demands. Difficulty factors are used in calculating class rank. Class rank, in turn, compares the academic quality of a student's work to that of other classmates.

Course Requirements English Department

Four English courses are required, one at each grade level 9-12. Consult with present English teacher for guidance in selecting the proper course.

TYPICAL ENGLISH COURSE SEQUENCING

Year	Academic Sequence	Honors Sequence
9th Grade	Intro to Lit/Comp I	English 9 H
10th Grade	Intro to Lit/Comp II	English 10 H
11th Grade	A I :4/C	English 11 H or
	American Lit/Comp	AP Language & Composition
12th Grade	British Literature & Composition or	
	Technical English 12 or	AP Literature & Composition
	PA College Technology English	

ELECTIVE ENGLISH CLASSES

Personal Communication	Journalism I	

^{*} Students will be required to take end-of-course literature Keystone Exam at the end of 10th grade year.

Honors English

The sequential four-year program in Honors English challenges the student to encounter literature, language and composition on a more mature level and at a faster pace than is expected in the traditional English programs. Honors English seeks to develop inquiring and motivated students. Participants must assume the academic responsibility to read carefully, to generate ideas, and to support with evidence both oral and written opinions. Candidates should be willing to write frequently in many forms for a variety of audiences.

Admission to the Honors program in English is based upon a student's previous achievement, and the decision to apply for admission should be made after the student consults with parents, school counselor and English teacher.

English Course Descriptions

Course Name and Number	Difficulty Level	Credit	
Intro to Lit/Composition I (00190)	1.2	1.0	N

Course Description

Introduction to Literature & Composition I develops students' language arts skills in reading, writing, speaking, and listening. The study of literature includes: short story, literary nonfiction, speeches, informational texts, novels, drama and poetry studied within thematic units. The writing program stresses the use of the writing process as students develop their voice and style. In addition, students practice writing and responding to prompts similar to those used on the Keystone Literature exam.

Course Name and Number	Difficulty Level	Credit
English 9 Honors (00090)	1.4	1.0

English 9 Honors focuses on creative and analytical writing, speaking, listening and critical thinking skills through the study of themes in literature and author's purpose in nonfiction texts. Writing in the course stresses the writing process and encourages students to develop a sense of voice and an awareness of audience. In addition, students learn to create thesis statements and provide support for these statements. Author's purpose and analysis of literary elements is explored through reading and discussing plays, poetry, novels, short stories and nonfiction in thematic units. The course focuses on careful reading of these literary and nonfiction works. The writing and reading programs also help students to achieve proficiency on the Keystone Literature exam.

Course Name and Number	Difficulty Level	Credit
Keystone Literature Remediation (00070)	1.0	1.0

This course is designed to provide students who did not score proficient on the Keystone Literature Exam with additional practice and skill development in the study of literature emphasizing Keystone Literature eligible content, Keystone glossary terms, constructed response style questions, and terminology and concepts associated with the successful study and analysis of American Literature. The goals of this intervention course are to help students score proficient or above on the Keystone Literature Exam, improve individual reading skills, and to support students in their American Literature course.

*Students not reaching proficiency on the Pennsylvania Literature Keystone Exam are required by PDE to take this course. This course counts as an elective.

Course Name and Number	Difficulty Level	Credit
Intro to Lit/Composition II (00020)	1.2	1.0

Course Description

Introduction to Literature & Composition II offers students further development in Language Arts and in reading, writing, speaking, and listening skills and intensive practice of the skills required to be proficient on the end of course exam, the Keystone Literature test. The study of literature includes: short story, literary nonfiction, speeches, informational texts, novels, drama and poetry studied within thematic units. The writing program stresses the use of the writing process as students analyze texts and continue to refine their own voice and style. In addition, students practice writing and responding to prompts similar to those used on the Keystone Literature exam.

Course Name and Number	Difficulty Level	Credit
English 10 H (00010)	1.4	1.0

Course Description

English 10 Honors provides the student with the opportunity to improve specific language, composition and reading skills. Compositional emphasis is placed on developing a thesis and offering support for it through citation, and on writing the tightly structured critical essay. Ideas behind literature, historical movements, art and music are offered as means of placing literature within both historical and a social context. The study of selections from world literature spans the time-line from Sophocles to modern authors and offers exposure to both famous writers and those who are less well known. Literary criticism of specific works is studied in order to enhance the students' understanding of others' thinking. Focus is given to text structures, text analysis and critical thinking skills, vocabulary study, supplementary reading and Keystone Literature exam preparation.

Course Name and Number	Difficulty Level	Credit
American Lit/Comp (00120)	1.2	1.0

Course Description

American Literature and Composition offers students further development in reading, writing, speaking, and listening skills. The study of literature in American Literature and Composition consists of a survey course of texts written by American authors. The course focuses on composition, including the completion of a character analysis essay and a research based argumentative essay. Mechanics and usage, critical reading, analysis of texts and observation, organization and support of ideas, historic perspective and literary appreciation are emphasized.

Course Name and Number	Difficulty Level	Credit	
English 11 H (00110)	1.4	1.0	i)

English 11 Honors presents a survey of the prose and poetry of American literature and related nonfiction and critical essays. Students examine major themes and patterns of thought in and between six major literary periods. In addition, the course strongly emphasizes composition, encouraging students to develop a writing style that is clear, logical and flexible. Beyond developing a thesis and offering support for it through citations, students will develop an understanding and use of counterargument in analytical essays.

Course Name and Number	Difficulty Level	Credit
AP English 11: English Lang and Comp (00340)	1.45	1.0

Course Description

The AP course in English Language and Composition engages students in becoming highly skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Student writing and reading will make students aware of the interactions among a writer's purpose, audience expectations, and subject, as well as the way genre conventions and the resources of language contribute to effectiveness in writing.

Within the context of American Literature, critical essays and related nonfiction, students will write formal essays and in class timed essays in several forms about a variety of subjects based on readings representing a wide variety of prose styles and genres with a heavy emphasis on rhetorical devices and strategies.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	
British Literature/Composition (00220)	1.2	1.0	NCAA

Course Description

British Literature and Composition offers students further practice in the Pennsylvania Common Core Standards for College and Career Readiness. The study of literature in British Literature and Composition consists a survey of English literature and culture from the Anglo-Saxon period to the twentieth century. The writing program stresses the writing process to develop college level writing skills.

Course Name and Number	Difficulty Level	Credit		Penn College
PCT* English Composition (00100)	1.4	1.0	NCAA	NOW DUAL ENROLLMENT

Course Description

Fundamental writing and research skills with an emphasis on expository writing. Emphasis on analysis, discussion, and practice of writing that explores, explains, and argues. Course work includes a significant research component. 3 Credits This course is taught in accordance with Pennsylvania College of Technology's ENL111: English Composition I Prerequisite(s): Placement by Examination & Completed a WAHS Course in American Literature Recommended Grade: 12 & Students Planning to Attend Penn College

*As a dual enrollment course, students must adhere to all Penn College NOW course expectations

Course Name and Number	Difficulty Level	Credit
AP English 12: English Lit and Comp (00350)	1.45	1.0

Course Description

AP English 12 prepares the exceptional student of English for the English Literature and Composition Advanced Placement Examination offered in May. Mostly within context of British Literature, students will be required to write interpretations of literature based on a careful observation of textual details, considering the work's structure, style, theme; social and historical values; and such elements as the use of figurative language, imagery, symbolism and tone. This course will require students to write and rewrite formal, extended analyses and timed, in-class responses. The course requires writing to understand, to explain and to evaluate.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	

Technical English 12 (00240)	1.2	1.0	

This academic English course offers students the reading and writing skills and strategies needed to successfully begin a college major and career path. Students will focus on the reading, writing and communication experiences helpful in transitioning to a postsecondary setting. Reading selections will include fiction and nonfiction that students can expect to encounter in a college classroom, place of business or technical field. Writing assignments offer students practical experiences in reporting research findings using MLA and APA documentation styles and communicating information to a variety of audiences through clear, concise, and purposeful writing in multiple forms. Four units are organized around contemporary themes allowing students to read a wide range of fiction and nonfiction relating to the world around them.

Course Name and Number	Difficulty Level	Credit
Journalism I (00450) Journalism II (00460)	1.3	1.0

Course Description

The full-year elective course in yearbook journalism helps students to understand the world of journalistic research, interviewing, writing, photography, theme development, cover design, layout, design of spreads within sections of the yearbook and publishing through hands-on experiences in creating the school's yearbook.

Prerequisite: Membership on the yearbook staff or written permission of the instructor.

Course Description

The formal study of public speaking allows students to understand theory and to practice the techniques of effective oral communication. A strong emphasis is placed on students understanding and adapting speech based on the rhetorical relationships between a speaker, audience, and subject. Students write and present a variety of speeches, craft creative, analytical, persuasive, and expository writings.

Recommended Grades: 11th- 12th.

Course Requirements Social Studies Department

Three to four Social Studies courses are required within grade levels 9-12. It is recommended students consult with Social Studies faculty for guidance in selecting Social Studies courses.

TYPICAL SOCIAL STUDIES COURSE SEQUENCING

Year	Academic Sequence	Honors Sequence

ELECTIVE SOCIAL STUDIES

*Introduction to Psychology *Introduction to Sociology

Course Descriptions: Social Studies

Course Name and Number	Difficulty Level	Credit	
United States History II (10200)	1.2	1.0	NCAA

Course Description

This course provides a survey of major topics in US History from the 1880s to present. An emphasis will be placed on the social, political, and economic development of the United States. Other themes will include America and the World, Cultural Development, and Geography. Students will use primary documents, biographies, and literature related to the topics covered. An emphasis is placed on reading and writing in the content and historical skill development. This course provides a detailed coverage of United States History designed to meet Common Core Standards and help students develop an understanding of how modern America formed.

Grade 9 Social Studies

Course Name and Number	Difficulty Level	Credit	1
United States History II H (10210)	1.4	1.0	

Course Description

This course provides a survey of major topics in US History from the 1880s to present. An emphasis will be placed on the social, political, and economic development of the United States. Other themes addressed will include America and the World, Cultural Development, and Geography. Students will use primary documents, biographies, and literature related to the topics covered. An emphasis is placed on reading, writing, and historical skill development in preparation for future honors level courses or advanced placement course work.

This course provides a detailed coverage of United States History designed to meet Common Core Standards and help students develop an understanding of how modern America formed.

Grade 9 Social Studies

Course Name and Number	Difficulty Level	Credit	

^{*} Introduction to Psychology and Sociology count for a social studies credit, either .50 individually or together for 1 credit.

Civics and Government (10060)

1.2

1.0

Course Description

This 10th grade course will examine America's society, its values, and, what it means to be an American citizen. It will cover the roots of American democracy, the American Revolution, the creation of the Constitution and the birth of our nation. This will then lead into an understanding of our government and the importance of participating in the political process on all levels including local, state, and federal. Policy-making, creation of laws and their enforcement will be discussed which will provide for an understanding of our domestic policies. There will also analysis of foreign policy, how it is developed and the impact it has on domestic as well as global affairs.

Recommended Grades: 10

Course Name and Number	Difficulty Level	Credit
Civics and Government H (10080)	1.4	1.0

Recommended Grades: 10

Course Name and Number	Difficulty Level	Credit
AP US Government and Politics (10220)	1.45	1.0

Course Description

AP United States Government and Politics prepares the exceptional student of U.S. government for the Advanced Placement examination. The course meets the Pennsylvania Civics and Government Standards by providing students an analytical perspective on government and politics in the United States. Students will examine the development and Constitutional basis of our government with particular attention focused on federalism and the separation of powers. Political beliefs and behaviors, political parties, interest groups, public policy, Congress, the presidency, bureaucracy, the federal courts, and the mass media will be examined in detail. The development of individual rights and liberties and their impact on citizens will be studied through an analysis of the workings of the Supreme Court and its most significant decisions. Students will be expected to use primary documents, biographies, political literature, and original research. They will complete document based as well as content focused assessments. Students enrolled in this course are strongly encouraged to take the Advanced Placement Examination in United States Government and Politics.

Successful students are 1) willing and able devote considerable time to read texts and master course materials, 2) self-motivated learners who commit to reading and studying on a daily basis, and 3) highly organized students who monitor their progress throughout the course. Students who lack study time due to other commitments or students with poor organization skills will have difficulty succeeding in this course. It is recommended that students have achieved a high average in either AP United States Government and Politics or Civics and Government (Honors). Students enrolled in AP United States History are strongly encouraged to take the Advanced Placement Examination in May.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit
AP United States History (10110)	1.45	1.0

AP United States History prepares the exceptional student of United States History for the Advanced Placement examination administered near the end of the school year in May. The course begins with pre-Columbian America (pre-1492) and ends with the present. Students are expected to read a college-level textbook, along with supplemental articles written by professional historians. Students will also analyze primary sources from all periods of U.S. history. The course will involve students in research, analysis, writing, class presentations, and periodic assessments. Students will learn to construct document-based essays using analysis, evaluation, and integration with other material.

Successful students are 1) willing and able devote considerable time to read texts and master course materials, 2) self-motivated learners who commit to reading and studying on a daily basis, and 3) highly organized students who monitor their progress throughout the course. Students who lack study time due to other commitments or students with poor organization skills will have difficulty succeeding in this course. It is recommended that students have achieved a high average in either AP United States Government and Politics or Civics and Government (Honors). Students enrolled in AP United States History are strongly encouraged to take the Advanced Placement Examination in May.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit
Modern World History A (10320)	1.2	1.0

Course Description

This course provides a thorough coverage of world history from 1500 through the present. Students will use skills of chronological thinking, historical comprehension, historical research, critical thinking, connections across time, and fundamentals of historical interpretation as they examine the history of mankind. Units of study in this course include the Renaissance and Reformation, the Age of Exploration, Ideas and Revolutions, Developing Nationalism, Wars and Revolutions, as well as the histories of Russia, the Middle East, and the Far East. Students will continually examine global interdependence and the unresolved problems of the modern world.

Grade 11

Course Name and Number	Difficulty Level	Credit		Penn College
PCT World History II (10350)	1.40	1.0	NCAA	NOW DUAL ENROLLMENT

Course Description

Study of the history of humankind from A.D. 1500 to the present. Equal emphasis is placed on the political, economic, and social development of Western and non-Western civilizations. Students will use skills of chronological thinking, historical comprehension, historical research, and fundamentals of historical interpretation as they examine the history of mankind. Units of study in this course include the Globe Encompassed, Renaissance and Reformation, the Age of Exploration, Ideas and Revolutions, as well as growth and development of land empires, Imperialism, and developments of the 20th century. Students will be expected to use primary documents, internet technology, and research and presentation skills as they address historical problems. 3 Credits

Prerequisite: Grades: 11 or 12 (honors or higher level students willing to complete college level course work)

* As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

* This course meets PCT requirements and is taught in accordance with Pennsylvania College of Technology's HIS126: World History II

* As a dual enrollment course, this course is offered in lieu of and will also be given credit for a WAHS honors course.

Course Name and Number	Difficulty Level	Credit	
Global Studies (10360)	1.2	1.0	NCAA

Global Studies is a current & topical look at the forces driving globalization. From democratization, human rights, social issues, politics, global economics and geography to terrorism, pandemics, conflicts, culture, religion and environmental concerns; this course explores global issues that transcend boundaries and are challenging the international system. This course places complex issues into comprehensive context and explains the growing political, economic, and cultural interdependence visible in the headlines and in peoples' lives. The areas of study will include the Americas, Europe, the Middle East, Africa and Asia.

This is a 12th grade course selection.

Course Name and Number	Difficulty Level	Credit	
------------------------	------------------	--------	--

Global Studies is a current & topical look at the forces driving globalization. From democratization, human rights, social issues, politics, global economics and geography to terrorism, pandemics, conflicts, culture, religion and environmental concerns; this course explores global issues that transcend boundaries and are challenging the international system. This course places complex issues into comprehensive context and explains the growing political, economic, and cultural interdependence visible in the headlines and in peoples' lives. The areas of study will include the Americas, Europe, the Middle East, Africa and Asia.

As this course surveys a wide range of global issues, it encourages understanding our global environment as a foundation for students' social, political, and economic engagement beyond the classroom.

Students will read, write, discuss, analyze and take positions on multiple topics in order to frame and defend arguments. Students will use a variety of print and non-print sources to analyze and suggest solutions to real-world problems and to analyze environmental and societal issues. Students will develop critical thinking skills and perspectives to better understand the world around them. Students should expect to experience the use of technology, research and critical/analytical thinking.

This is a 12th grade course selection.

Course Name and Number	Difficulty Level	Credit
AP European History (10710)	1.45	1.0

Course Description

AP European History prepares the exceptional student of European History for the Advanced Placement examination. The scope of this course will include major events and trends from the Renaissance (c.1450) through the present. Broad consideration will be given to global concepts to show European impact on the world. Students will be expected to use primary documents, biographies, literature of each historical period, and original research in their study. Research projects and papers are basic to this course. Students will be expected to complete document based as well as content focused assessments. This course is designed to provide a detailed coverage of European History. Skills required: critical thinking, analysis of specific textual content, integrate and evaluate multiple sources, decipher between tone and mood, evaluate point of view, and draw connections across time. An emphasis on reading and writing is paramount in this AP course as all level of work reflects AP curriculum.

Successful students are 1) willing and able devote considerable time to read texts and master course materials, 2) selfmotivated learners who commit to reading and studying on a daily basis, and 3) highly organized students who monitor their progress throughout the course. Students who lack study time due to other commitments or students with poor organization skills will have difficulty succeeding in this course. It is recommended that students have previously achieved successful completion of an AP level Social Studies course. Students enrolled in AP European History are strongly encouraged to take the Advanced Placement Examination in May.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit
Introductory Sociology (1051X)	1.2	.50

Course Description

Sociology is an interdisciplinary approach to the study of human behavior and relationships. The course will incorporate concepts from the behavioral sciences of sociology, psychology, and anthropology, and apply them to the individual and to his life as a member of various groups.

Grades: 11 and 12

Course Name and Number	Difficulty Level	Credit	
Introductory Psychology (1061X)	1.2	.50	NCAA

Course Description

Introductory Psychology is a highly interactive course designed to introduce students to psychology as preparation for more indepth study in college. This course is also for students who have an interest in human behavior and who enjoy hands-on activities and vigorous discussion. After studying the history of and differing approaches to psychology, students will examine the critical role of the brain, sensation, perception, learning, memory, personality and consciousness. These units will provide a framework for the study of life span development and psychological disorders and their treatment.

Grades: 11 and 12

Course Name and Number	Difficulty Level	Credit
------------------------	------------------	--------

PCT Psychology (10630)

1.4

1.0

Course Description

PCT Psychology

A college level introduction to the science of human behavior and mental processes. Students examine the relation between the nervous system and behavior, learning, perception, language, personality, intelligence, and psychopathology. **Introductory Psychology is not a pre-requisite, although it is highly recommended.**

Successful students are 1) willing and able devote considerable time to read texts and master course materials, 2) self-motivated learners who commit to reading and studying on a daily basis, and 3) highly organized students who monitor their progress throughout the course. Students who lack study time due to other commitments or students with poor organization skills will have difficulty succeeding in this course. It is recommended that students have previously achieved successful completion of rigorous courses. 3 Credits

*This course meets PCT requirements and is taught in accordance with Pennsylvania College of Technology's PSY 111: General Psychology course work, course requirements and expectations. Successful completion of this course does count for social studies credit.

- * Grades: 11 or 12 (honors or higher level students willing to complete college level course work)
- * As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.
- * As a dual enrollment course, this course is offered in lieu of and will also be given credit for a WAHS honors course.

Course Name and Number	Difficulty Level	Credit
AP Psychology (10620)	1.45	1.0

Course Description

AP Psychology prepares the exceptional student of Psychology for the Advanced Placement examination. The AP Psychology course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. Students enrolled in this course are strongly encouraged to take the Advanced Placement Examination in May. Introductory Psychology is not a pre-requisite, although it is recommended.

Successful students are 1) willing and able devote considerable time to read texts and master course materials, 2) self-motivated learners who commit to reading and studying on a daily basis, and 3) highly organized students who monitor their progress throughout the course. Students who lack study time due to other commitments or students with poor organization skills will have difficulty succeeding in this course. It is recommended that students have previously achieved successful completion of an AP level course.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Requirements Mathematics Department

Four (4) math courses are required for graduation. Our most successful students graduate with four math courses, making their transcripts much more competitive as they seek admission to post-graduate school or as they enter the workplace.

TYPICAL MATH COURSE SEQUENCING

Year	Academic Sequence	Honors Sequence
9th Grade	Algebra 1 *	Algebra 2H
10th Grade	Algebra 2	Geometry H/AP Computer Science A
11th Grade	Geometry	PreCalc/Trigonometry H/PCT Math 124/125, AP
		Computer Science A
12th Grade	Trigonometry/PCT Math/Statistics/	AP Calculus 1 / AP Calculus 2 /AP Statistics/AP
	Career Mathematics/Alg III	Computer Science A

^{*} Students will be required to take end-of-course Algebra 1 Keystone Exam. Elective: Introduction to Computer Science (Semester .5 credit)

Course Descriptions: Mathematics

Course Name and Number	Difficulty Level	Credit	
Algebra I (20110)	1.2	2.0	NCAA

Course Description

Algebra I is the study of the basic structure of algebra from real numbers through functions and relations. The major topics of this first year course are operations with real numbers and variables, the structure of our number system, the solution and graphing of equations and inequalities, systems of linear equations, operations with polynomials, and the concepts of functions and relations, and data analysis.

Course Name and Number	Difficulty Level	Credit	
Modern Algebra II (H) (20140)	1.4	1.0	NCAA

Course Description

Essentially including many of the topics in Algebra II, this honors course moves at a faster pace and treats individual topics in greater depth. There is a greater emphasis on factoring and applications of algebraic properties.

It is recommended that students successfully complete Algebra I in middle school

Course Name and Number	Difficulty Level	Credit	
Algebra II (20120)	1.2	1.0	NCAA

Course Description

This continues to develop understanding of Algebraic concepts. Students can expect to solve various non-linear equations. We extend the study of numbers to include irrational and non-real numbers. There will be extensive study on families of functions including linear, polynomial, exponential and logarithmic functions. In addition, there will be a unit of study on data analysis that includes combinations, permutations, odds and the fundamental counting principle.

Prerequisite: Algebra I

Course Name and Number	Difficulty Level	Credit
Plane Geometry (20220)	1.2	1.0

Plane Geometry is a study of logical reasoning, lines, angles, polygons, circles and constructions. It is designed for the average to above average student and includes a balance of theory and application. Algebraic skills are reviewed and strengthened through applications to solving problems in geometry.

Prerequisite: Algebra I

Course Name and Number	Difficulty Level	Credit
Modern Geometry (H) (20230)	1.4	1.0

Course Description

This course follows the freshman course, Modern Algebra II Honors, and places much emphasis on deductive reasoning within a mathematical system. Theoretical and conceptual descriptions and applications of plane, coordinate, and solid geometry are central to the course. The development of constructions and proofs throughout the course can be expected. *It is recommended that students successfully complete Algebra II Honors*.

Course Name and Number	Difficulty Level	Credit
Trigonometry (20310)	1.2	1.0

Course Description

Trigonometry is a study of circular and trigonometric functions including work with identities, graphs, inverses functions and the study of triangles. After basic concepts have been mastered, trigonometric applications and related topics will be studied. Additional topics include vectors, polar coordinates, and complex numbers.

Prerequisite(s): Algebra II and Geometry

Course Name and Number	Difficulty Level	Credit	
Pre-Calculus with Trigonometry (H) (20320)	1.4	1.0	NCAA

Course Description

Modern Trigonometry is a pre-calculus course with a major emphasis on analysis of functions. Other topics include trigonometric and other transcendental functions. Additional topics may include conic sections, vectors, polar coordinates, complex numbers, and sequences and series. Hand-held calculators are used on a regular basis and the course includes much work on applications.

It is recommended that students successfully complete Algebra II Honors and Modern Geometry Honors.

Course Name and Number	Difficulty Level	Credit	
Statistics (20450)	1.2	1.0	NCAA

Course Description

This one-year course for seniors is designed to provide students with a strong foundation for an introductory college statistics course. This course will introduce students to real world applications of displaying and describing data, the normal curve, probability, statistical inference, confidence intervals, and hypothesis tests.

Recommended Grade: 12th

Prerequisite(s): Algebra II and Geometry

Course Name and Number	Difficulty Level	Credit	
AP Statistics (20440)	1.45	1.0	NCAA

Course Description

This one-year course for sophomores, junior, or seniors who have completed Algebra II H, or the academic Statistics, is designed to prepare students for the advance placement statistics exam. The course will introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to the broad conceptual themes of exploring data, sampling and experimentation, anticipating patterns, and statistical inference.

Recommended Grade: 10th, 11th and 12th Prerequisite(s): Algebra II or Statistics

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit
reer Mathematics (20070)	1.0	1.0

This math course is designed specifically for non-college bound seniors preparing for successful futures beyond high school. Many employers and post-secondary career training programs require applicants to demonstrate core algebra skills as part of the selection process. This course is for seniors only.

Prerequisite: Algebra I

Course Name and Number	Difficulty Level	Credit	
Algebra III (20130)	1.2	1.0	NCAD

This course is designed for students who plan to attend college. Topics focus on foundational skills that include intermediate algebra and trigonometry, algebraic expressions, linear equations, systems of equations, right triangle trigonometry, functions, graphs, geometry in application, and variation. Topics also include more advanced topics such as factoring, algebraic fractions and equations, quadratic equations, trigonometric functions and graphs, radicals, complex numbers, exponential and logarithmic functions and graphs, nonlinear systems, and inequalities. There is an emphasis on foundational skills and problem solving.

Prerequisite(s): Algebra 1, Algebra 2, Geometry

Course Name and Number	Difficulty Level	Credit		Penn College
PCT* Math 124 (20541)	1.4	0.50	NCAA	NOW DUAL ENROLLMENT

Course Description

Study of intermediate algebra and trigonometry, designed to prepare students for course work in their technical majors. Topics include algebraic expressions, linear equations, systems of equations, right triangle trigonometry, functions, graphs, geometry, ratio and proportion, and variation. Emphasis on problem solving and technical application as well as the use of technology. Not designed to prepare students for calculus.

3 Credits (3 Lecture - 0 Lab) Prerequisite(s): MTH005 or Placement by Examination.

*This course meets PCT requirements and is taught in accordance with Pennsylvania College of Technology's MTH 124: Technical Algebra and Trigonometry I course work, course requirements and expectations.

Course Name and Number	Difficulty Level	Credit		Penn College
PCT* Math 125 (20542)	1.4	0.50	NCAA	NOW DUAL ENROLLMENT

Course Description

Study of intermediate algebra and trigonometry, designed to prepare students for course work in their technical majors. Topics include factoring, algebraic fractions and equations, quadratic equations, trigonometric functions and graphs, radicals, complex numbers, exponential and logarithmic functions and graphs, nonlinear systems, and inequalities. Emphasis on problem solving and technical application as well as the use of technology. Not designed to prepare students for calculus. 3 Credits (3 Lecture - 0 Lab)

Prerequisite(s): PCT MATH 124

*This course meets PCT requirements and is taught in accordance with Pennsylvania College of Technology's MTH 125: Technical Algebra and Trigonometry II course work, course requirements and expectations.

Course Name and Number	Difficulty Level	Credit	
Calculus I (H)(20350)	1.4	1.0	NCAA

Course Description

Calculus I Honors is the study of change. This course is designed for students who wish to take calculus but without the Advanced Placement focus. The foundation for this study is limits and function behavior. This course will provide students with an understanding of the basic components of calculus: limits and functions, derivatives, integrals, and applications of all subjects.

It is recommended that students successfully complete Pre-Calculus with Trigonometry H or Trigonometry with teacher recommendation.

Course Name and Number	Difficulty Level	Credit
AP Calculus I (AB) (20510)	1.45	1.0

Calculus I AP consists of the study of functions, limits, derivatives, and single variable integrals. Through this course, the students will develop an understanding of the concepts of calculus and provides experience with its methods and applications. This course will cover all material needed for the student to take the Calculus AB Advanced Placement Exam, given in the beginning of May each year. All students taking this course are expected to take the AP Calculus Exam. It is recommended that students successfully complete Pre-Calculus with Trigonometry H or Trigonometry with teacher recommendation.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	
AP Calculus II (BC) (20520)	1.45	1.0	ł

Course Description

Calculus II AP (BC) is a standard second year course in single variable calculus and analytic geometry, involving integration by parts, improper integrals, trigonometric substitution, infinite series, power series and polar coordinates, This course will include the material needed for the student to take the Advanced Placement Test in Calculus BC, given in May of each year. Students are encouraged to take the AP exam.

Prerequisite: AP Calculus I

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	
AP Computer Science A (20001)	1.45	1.0	NCAA

Course Description

AP Computer Science A is an introductory college-level computer science course. Students cultivate their understanding of coding through analyzing, writing, and testing code as they explore concepts like modularity, variables, and control structures.

Prerequisite: Successful Completion of Algebra II

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	
Intro to Computer Science (20002X)	1.2	0.5	NCAA

Course Description

An interactive introductory course for students brand new to programming that teachers the foundations of computer science using the Python language. Not only will this year-long course prepare students for AP Computer Science A, but it will teach students to think computationally and solve complex problems, skills that are important for every student. This course is a math elective.

Prerequisite: None

Course Requirements Science Department

Three (3) science courses are required for graduation with at least one course being completed per year. However, it is strongly recommended that students planning to major or work in a science, technology, engineering, or math (STEM) related field schedule at least one science course during each year of high school. A well-rounded science education includes taking courses in a wide range of science disciplines including the life sciences, the physical sciences, and the Earth sciences.

RECOMMENDED ACADEMIC AND HONORS SCIENCE COURSE SEQUENCES

Year	Academic Sequence	Honors Sequence
9th Grade	Biology	Biology I H
10th Grade	Integrated Science	Chemistry I H
11th Grade	Chemistry I	Physics I H
12th Grade	Elective Science If Desired	Elective Science

^{*} Students will be required to take end-of-course Biology Keystone Exam.

FULL-CREDIT SCIENCE ELECTIVES

Anatomy/Physiology	AP Environmental Science	Physics I
AP Biology	AP Physics 1	Physics I Honors
AP Chemistry (2 Periods)	AP Physics 2	Topics of Science

HALF-CREDIT SCIENCE ELECTIVES

Astronomy	Geology	Oceanography
Genetics	Meteorology	Bio Keystone Remediation

^{*} Half-credit science electives count for a science credit, either .50 individually or together for 1 credit.

Course Descriptions: SCIENCE

Course Name and Number	Difficulty Level	Credit	NCAA
Integrated Science (30080)	1.2	1.0	WCZZ

Course Description

The goal of this course is to provide students with an introduction to fundamental topics within the fields of biology and chemistry. This course will focus on biological principles that include the cell, cell processes, classification, and ecology. The course will also focus on various chemistry topics that include properties of matter, atomic structure, macromolecules, chemical bonding, and the periodic table. This course will encourage students to investigate the physical world around them through various laboratory activities and applications of the scientific method. Successful completion of this course will prepare students for future science courses including chemistry and physics. **Students** who are not proficient on the biology Keystone exam will be scheduled for this course during their 10th grade year and will retest on the Biology Keystone exam during the January testing window.

Course Name and Number	Difficulty Level	Credit	
Biology I (30200)	1.2	1.0	NCAA

Course Description

This course focuses on mastery of the PA Keystone Biology Assessment Anchors. Students will investigate living things at the molecular, cellular, and organism level. An emphasis will be placed on the structures and processes necessary for all organisms to maintain life. Additional topics to be covered in this course include genetics, ecology, and evolution.

*Students taking this course will be required to complete the end-of-course Pennsylvania Biology Keystone Exam.

Course Name and Number	Difficulty Level	Credit	
Biology I Honors (30210)	1.4	1.0	NCAA

Course Description

This course focuses on mastery of the PA Keystone Biology Assessment Anchors. Students will investigate living things at the molecular, cellular, and organism level. An emphasis will be placed on the structures and processes necessary for all organisms to maintain life. Additional topics to be covered in this course include genetics, ecology and evolution. Essentially covering the same topics as Biology I, this honors course moves at a faster pace, addresses individual topics in greater depth, and introduces students to technical lab report writing.

*Students taking this course will be required to complete the end-of-course Pennsylvania Biology Keystone Exam.

Course Name and Number	Difficulty Level	Credit
Biology Keystone Remediation (30280)	1.0	0.5

Course Description

This course focuses on mastery of the PA Keystone Biology Assessment Anchors. Students will investigate living things at the molecular, cellular, and organism level. An emphasis will be placed on the structures and processes necessary for all organisms to maintain life. Additional topics to be covered in this course include genetics, ecology and evolution.

*Students not reaching proficiency on the Pennsylvania Biology Keystone Exam are required by PDE to take this course. This course counts as an elective. It will be offered in the Fall and Spring semester.

Course Name and Number	Difficulty Level	Credit
Chemistry I (30300)	1.2	1.0

This course will investigate the composition, structure, and properties of matter and how substances interact and transform. Classroom demonstrations and laboratory activities will complement and reinforce lecture materials. Students will learn about the chemical makeup of the world around them and applications of chemistry.

Course Name and Number	Difficulty Level	Credit
Chemistry I Honors (30310)	1.4	1.0

Course Description

Essentially covering the same topics as Chemistry I, this honors course moves at a faster pace and addresses individual topics in greater depth. Students can expect a greater emphasis to be placed on significant mathematical applications as well. Classroom demonstrations and laboratory activities will still complement and reinforce lecture materials. Furthermore, students will continue developing their technical lab writing skills.

Co-requisite: Algebra II or Modern Algebra II Honors

Course Name and Number	Difficulty Level	Credit
Physics I (30400)	1.3	1.0

Course Description

This course studies the physical laws that govern the universe and are the basis for all science courses. Areas of concentration include, forces, energy, uniform circular motion, planetary motion, heat, wave motion, light, electricity and magnetism. This course will be beneficial to all college bound students, as it will enhance their problem solving skills in science courses. It is also recommended for students intending to pursue careers in science, engineering, or the medical technologies.

Co-requisite: Trigonometry or Pre-Calculus with Trigonometry Honors

Course Name and Number	Difficulty Level	Credit
Anatomy and Physiology (30250)	1.3	1.0

Course Description

This course in human anatomy and physiology helps to prepare students for careers in medicine, nursing or related health care or teaching fields. Studies focus on different systems of the human body. However, laboratory activities include dissections of a rat, eye, brain, heart and kidney. The course has a practical application as well for students who are interested in a detailed examination of the structure and function of the human body.

This course is designed for 11th and 12th grade students.

Course Name and Number	Difficulty Level	Credit
Astronomy (3051X)	1.2	0.5

This course is an emphasis on Earth and Space Science, with predominate focus on Astronomy. Content will be delivered, not only on the physical nature of the exosphere, space, and the universe beyond, but also on Man's past, present, and future in space. Students in this class will also use the planetarium to learn the star field of our Northern Hemisphere circumpolar and seasonal skies. This course will have special value for students considering a career in astronomy or those who have an interest in these topics. It would also be a great introductory course for anyone looking to take AP Environmental Science.

This course is designed for 11th and 12th grade students.

Course Name and Number	Difficulty Level	Credit
Genetics (3072X)	1.2	0.5

Course Description

This course continues the study of biology by diving deeper into the subtopic of genetics (the study of genes, genetic variation, and heredity in organisms). Topics to be covered in this course include inheritance patterns, Mendelian genetics, gene structure & function, genetic abnormalities, the Human Genome Project, DNA technology, and the future of genetics in medicine, agriculture and one's life. Coursework will draw on learning from prior biology and chemistry courses and will emphasize problem solving, critical thinking and mathematical analysis (statistics & probability). This course should be of particular interest to students looking toward biological, medical or health-related careers or anyone planning on taking AP Biology.

Prerequisites: Biology I and Chemistry I

Course Name and Number	Difficulty Level	Credit
Geology (3071X)	1.2	0.5

Course Description

This course is designed for those students with an interest in the nature and history of the solid Earth (rocks and minerals, geologic time, and fossils). Students will investigate the forces that build up the Earth (volcanoes, earthquakes, and continental drift) and the forces that tear down the Earth (water, wind, and glaciers). Important aspects of this course also include the use of topographic maps, Global Positioning Systems (GPS units), and the implications of the human impact on the Geosphere. There will also be a focus on the Marcellus Shale and its local potential, both environmentally and economically. This would be a great introductory course for anyone looking to improve their Earth Science skills or take AP Environmental Science.

This course will only be offered during the Spring semester. This course is designed for 11th and 12th grade students.

Course Name and Number Difficulty Level	Credit	
---	--------	--

Meteorology (3052X) 1.2 0.5

Course Description

This course is an emphasis on Earth's Atmospheric Sciences, including weather and climate. Content will be delivered, not only on the physical nature of the atmosphere and oceans, but also on Man's impact on the air and water environment. This course will have special value for students considering a career in meteorology or those who simply have an interest in these topics. It would also be a great introductory course for anyone looking to take AP Environmental Science.

This course will only be offered during the Fall semester. This course is designed for 11th and 12th grade students.

Course Name and Number	Difficulty Level	Credit	
Oceanography (3011X)	1.2	0.5	NCAA

Course Description

Oceanography is a multidisciplinary science that studies the physical, chemical, and biological systems of our world's ocean. Course topics include ocean floor geology, tides and currents, coastlines, water chemistry, marine ecology, and the ocean as a resource. Students will study natural and man-made influences that affect our world's ocean resources. Special emphasis will be placed on marine biology as we replicate and maintain natural systems in our school's aquariums. Students will participate in fish breeding, fish rearing, and coral propagation studies.

Prerequisites: Biology I and Chemistry I

Course Name and Number	Difficulty Level	Credit
Topics of Science (30060)	1.0	1.0

Course Description

This course focuses on mastery of the PA Academic Standards for Science and Technology. Students will investigate the Nature of Science, building 8 projects throughout the year. These projects will focus on the processes of engineering, following proper procedures, and tools required for each build. An introduction to each project with a background of the Physical Sciences, structure and sources of energy, forces and motion, and Earth and Space Sciences, with an emphasis on Earth features and processes will also be utilized. This course includes a considerable amount of hands-on inquiries and will include the explorations and applications of science in our world.

This course is not an NCAA approved course.

Course Name and Number	Difficulty Level	Credit	
AP Biology (30180)	1.45	1.0	NCAL

Course Description

AP Biology is an advanced course designed to offer students a solid foundation in introductory college-level biology. The course is structured around four big ideas and seven science practices that will give students the essential knowledge and skills to be successful in college-level life science courses. The process of inquiry and developing critical thinking skills will be an important focus, as well as the use of statistics in analyzing laboratory data. Many topics will build on previous knowledge (Evolution, Cell Communication, Cellular Energy, Cellular Reproduction, Genetics and Gene Expression, Homeostasis, Ecology) while other topics will be introduced (Viruses, Plants, Immune System, Nervous System). Successful students should be able to complete summer assignments prior to beginning the course and devote significant time outside of class for reading and practice.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Prerequisites: Biology I and Chemistry I

Course Name and Number	Difficulty Level	Credit
AP Chemistry (30370)	1.45	2.0

AP Chemistry is a second year course designed to meet the needs of our advanced students, especially those considering the fields of science or medicine. Challenging theoretical concepts regarding atomic theory, chemical reactions and energy transformation will be explored in both the classroom and laboratory settings. Extensive analytic lab work will be expected during the completion of required AP Chemistry lab investigations. Students are required to write multiple formal lab reports each marking period, making this a writing intensive course.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Prerequisites: Algebra 2 and either Chemistry I Honors or Chemistry I with teacher recommendation

Course Name and Number	Difficulty Level	Credit	NCAD
AP Environmental Science (30560)	1.45	1.0	WC22

Course Description

This advanced earth science course provides students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems, both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. Common themes of this course include (1) science is a process, (2) energy conversions underline all ecological processes, (3) the Earth itself is one interconnected system, (4) humans alter natural systems, (5) environmental problems have a cultural and social context, and (6) human survival depends on developing practices that will achieve sustainable systems.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Prerequisites: Biology I, Chemistry I, and Algebra 2.

Course Name and Number	Difficulty Level	Credit	NCAA
AP Physics 1 (30490)	1.45	1.0	west.

Course Description

This advanced physics course studies the main principles of physics with a strong emphasis on problem solving. Geometry, advanced algebra and trigonometry will be used daily to help students gain a deeper understanding of our physical universe. Topics include Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sounds. The course will also introduce electric circuits. The critical thinking skills and laboratory experiences in this course will prepare students for the AP Physics I test offered in May of each year. Students planning careers in mathematics, science, engineering or medicine will benefit from taking this course.

*Successful students devote a large amount of time independently working on problem sets outside of class.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Co-requisite: Trigonometry or Pre-Calculus with Trigonometry Honors

	D100 1 1	G 11.	
Course Name and Number	Difficulty Level	Credit	

AP Physics 2 (30550) 1.45 1.0

Course Description

Students will continue their study of physics as they explore electricity & magnetism, heat & thermodynamics, fluid statics & dynamics, optics and atomic & nuclear physics. The critical thinking skills and laboratory experiences in this course will prepare students for the AP Physics II test offered in May of each year. Students planning careers in mathematics, science, engineering or medicine will benefit from taking this course.

*Successful students devote a large amount of time independently working on problem sets outside of class.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Prerequisite: AP Physics I

World Languages Department

World Language Department

All World Language courses are sequential and elective in nature. The student enters the program with a Level I course. Upon completion of Level I, the student should consult with the instructor in order to determine proper placement for the second level course. The student who wishes to take courses at Levels III or IV must successfully complete Level II Academic and obtain the approval of the Level II instructor.

Course Descriptions: WORLD LANGUAGES

Course Name and Number	Difficulty Level	Credit	
German I (50100)	1.2	1.0	NCAL

Course Description

German I is a course in which students are introduced to the target language through a whole language approach. All four-language skills - listening, speaking, reading, and writing - are presented to ensure balanced development. The student will learn the language through authentic cultural and sociological contexts. Grammatical items are presented in meaningful context so that grammar is not an end to itself, but rather a vehicle through which students can discuss freely a given topic in the language.

Course Name and Number	Difficulty Level	Credit
German II (50110)	1.2	1.0

Course Description

German II is a continuation of the whole language method. The four language proficiencies of listening, speaking, reading and writing are reinforced through contexts relating to the students' actual experience and those of students in German speaking countries. Students are encouraged to be risk takers and use the target language in a variety of individual paired and group activities.

Course Name and Number	Difficulty Level	Credit
German III H (50130)	1.4	1.0

Course Description

German III H is a course in which the students are encouraged to strive for greater proficiency and accuracy in the four skill areas. An emphasis is placed on fine tuning listening, reading, writing, pronunciation and grammar skills. Text and literature readings will be followed by content discussions and evaluations in the target language. A greater emphasis in this level is placed on the ability to recognize and apply grammar rules and patterns with reinforcement through written and oral practice. Students are encouraged to use the target language as much as possible.

Course Name and Number	Difficulty Level	Credit	
German IV H (50140)	1.4	1.0	

Course Description

German IV H is a course in which students continue to develop proficiency in the four language skill areas. Students reinforce their knowledge of the target language through contexts relating to contemporary issues affecting their lives and those of the peoples of German speaking countries. Students are encouraged to use the target language almost exclusively. Representative works of German literature are presented with discussion and evaluation in the target language.

Course Name and Number	Difficulty Level	Credit
Spanish I (50200)	1.2	1.0

Course Description

Spanish I is an introduction to the language in which speaking and listening language skills are emphasized. Grammar basics, lists of common vocabulary and useful expressions are learned, and Hispanic cultural characteristics will be a focus of the course as well. Oral and written practice and evaluations will be used, including student oral presentations to the class. Please refer to the World Language brochure for further details of the course, and to be sure your goals and commitment to learn the language are aligned with those of the class.

Course Name and Number	Difficulty Level	Credit	
------------------------	------------------	--------	--

Spanish II (50210)

1.2

1.0

Course Description

Spanish II continues the study of the language with an emphasis on the development of the four language skills. Students will undertake an in-depth study of the grammatical structures and idiomatic expressions found in the language. Students will learn a variety of verbs in the present and past as well as commands.

Course Name and Number	Difficulty Level	Credit	
Spanish III H (50230)	1.4	1.0	

Course Description

At the third level, past grammatical concepts will be reviewed. By the completion of level 3 students will have studied all major verb forms and tenses. Students will read and react to Spanish literature and create short skits and dialogues as well. The student is expected to complete assignments in a self-disciplined, self-motivated manner.

Course Name and Number	Difficulty Level	Credit
Spanish IV H (50240)	1.4	1.0

Course Description

This is a course wherein the student will refine and review, where necessary, the previously learned grammatical and idiomatic concepts. Contemporary and historical aspects of Spanish culture will be examined. Students will read short stories and novels by major Spanish authors. Spanish artists and major works will be studied as well. Cultural units include Spanish foods and housing.

Course Name and Number	Difficulty Level	Credit
Latin I (50410)	1.2	1.0

Course Description

Latin I introduces the basic grammatical structure of the Latin language through a reading-based approach using Ecce Romani I. The course emphasizes the acquisition of fundamental vocabulary and its English derivatives, the cultural and mythological heritage of Rome, and the early history of the Roman Republic.

Course Name and Number	Difficulty Level	Credit	
Latin II (50420)	1.2	1.0	

Course Description

Latin II completes the grammatical instruction necessary to provide students with a thorough understanding of the principal tenets of the language. This will include, most importantly, indirect statement and the subjunctive mood. Students will use Ecce Romani II, which will continue the reading-based approach to learning Latin, and will continue the cultural and historical studies started in Ecce Romani I.

Course Name and Number	Difficulty Level	Credit	
Latin III H (50430)	1.4	1.0	

Course Description

Latin III is a thorough study of the events surrounding the downfall of the Roman Republic through the writings of the historians and political figures of the period. Authors include Cicero, Caesar and Augustus. The course also introduces students to the rudiments of Roman Poetry through Catullus, Martial and Ovid.

Course Name and Number	Difficulty Level	Credit
AP Latin IV (50450)	1.45	1.0

Course Description

The foundation of AP Latin 4 is the reading two of the Roman world's most important authors: Julius Caesar and the poet Vergil. We will follow the course requirements for the AP Latin syllabus, which prescribes a challenging but intellectually stimulating study of these two authors in preparation for the AP Latin exam in May. This will likely be the only opportunity in your academic career for you to study these giants of western culture, whose works and actions have had a lasting impact on literature through the modern age.

Students enrolled in this course are expected to take the Advanced Placement Examination.

Course Name and Number	Difficulty Level	Credit	NCAA
English Language Learners (01300)	1.2	1.0	

The English as a second language program (ELL) provides English language learners instruction and support in reading, writing, speaking and listening. The amount of services students receive is contingent upon their skill levels in the above-mentioned areas. Services not only include classroom instruction but also may include assessment, interpreter and tutoring services where appropriate.

Course Requirements Career & Technical Education Department

As students' progress through high school, it is important to do so with a goal of planning for a successful career. Most careers today require technical training. Williamsport Area High School students can prepare for college or career with Career & Technical Education (CTE) programs. CTE programs are approved by the Pennsylvania Department of Education.

NOTE: In cases where enrollments are limited in CTE courses, preference will be given to students who have selected a related occupation on their career objective.

FINANCIAL LITERACY & CAREER PATHY	VAYS	
COURSE NAME	D.F.	CREDIT
Career Pathways/ Financial Literacy (9110X)	1.0	0.50

This course is designed to provide 9th grade students with tools to maximize their success in high school. Half of the course will focus on Career Pathways, and the second half will focus on developing a student's understanding of financial literacy

Career Pathways

Students will explore career concepts and perform personal inventory assessments, detailed career explorations, investigate WAHS Pathways opportunities, CTE programs of study, and course selections. A second unit will provide students with best practice strategies for high school success and lifelong learning. The course will include "The 7 Habits of Highly Effective Teens".

The curriculum will be presented with a focus on information technology. Students will utilize and learn a variety of software applications, Internet tools, and Internet resources, increasing their skillset for future success.

Financial Literacy

This course takes the essential principles of personal finance and makes them accessible and applicable to today's students. All students will develop skills and strategies that promote personal and financial responsibility. Units will focus on areas such as money management, spending and credit, protecting your credit, debt management, and saving. The course makes use of a number of resources aligned with National and Pennsylvania standards. The course will culminate in an activity that synthesizes the student's financial awareness, and personal career planning.

COURSE NAME	D.F.	CREDIT
CTE Program Leadership (cr50 9282X, cr 1- 92830, cr 2- 92840)	1.2	0.50, 1.0, 2.0

This course will allow a Level 3 Student, who is recommended by the teacher and is in good academic, behavior, and attendance standing, to assist the CTE instructor with curriculum. This student would assist students with projects, and hone their competencies. These students would be graded by an employability rubric that assesses them on showing up to work, following expectations, and completing tasks in a timely, safe, and proper manner. This course would bring their CTE coursework to life in many different ways by continuing to learn and assist others in the learning process as well. These students are not to be utilized like aides. They are to be embedded in the instructional process and work on industry leadership skills.

Prerequisite: Recommendation only by program instructor

COURSE NAME	D.F.	CREDIT
Peer Leadership Experience (92860)	1.2	1.0

Students considering careers in the Human Services Pathway, especially in counseling, health, education, and personal care, may apply for enrollment as a peer mentor within the WASD integrated unified arts classes. In these classes, students with disabilities will be offered physical education, music, art, and/or drama experiences while being able to integrate and enjoy age appropriate and developmentally appropriate skill-related unit activities alongside of their typically developing peers. Peer mentors will be asked to assist a peer with a disability throughout the duration of their elective class. Regular education students enrolled in this course will gain direct instruction on best practices in leadership and in working with students with disabilities, as well as engage in activities from a wide variety of psychomotor, social, and cognitive experiences. Peer Mentors will be assessed and graded on their achievement of the Career Education and Work Standards.

AUTOCAD			
COURSE NAME	D.F.	CREDIT	Penn College
PCT* AutoCAD (91300)	1.4	1.0	NOW DUAL ENROLLMENT

This course is taught in accordance with Pennsylvania College of Technology's *CAD 120: AutoCAD-Comprehensive*. Dual enrolled students can receive three (3) credit hours upon completion of this class and subsequent enrollment at Pennsylvania College of Technology. This covers comprehensive application of 2D and 3D techniques using AutoCAD® software. Topics include the generation, editing, and analysis of geometry in alignment with industry standards with an emphasis on productivity.

^{*}As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

^{**} Course only available if there is an instructor available to teach

ACCOUNTING PROGRAM COMPLETION	
10th Grade	Accounting I
11th Grade	Advanced Accounting
12th Grade	Managerial Accounting

COURSE NAME	D.F.	CREDIT
Accounting I (40300)	1.2	1.0

Accounting is designed to give students a basic introduction to the business world so they can understand the daily financial activities completed by businesses. By following the steps of the accounting cycle, students will learn to analyze business transactions, record them on business forms, and prepare financial statements. Students will also complete an Accounting simulation. Accounting is a beneficial course for all students, but particularly so for students interested in opening their own business or majoring in any area of business --management, computer programming, business administration, marketing, law or accounting,

Recommended grades: 10th - 12th.

COURSE NAME	D.F.	CREDIT
Advanced Accounting (40360)	1.4	1.0

Students will broaden their accounting knowledge by focusing on accounting processes for a merchandising business organized as a corporation. This course will concentrate on accounting for purchases, sales, cash payments and receipts, payroll, and uncollectible accounts receivable. In addition, students will prepare adjusting and closing entries, trial balance, and financial statements for a corporation. An accounting simulation, as well as completing coursework using online accounting forms, will bring real world application to the course.

Recommended grades: 11th and 12th.

Prerequisite: Successful completion of Accounting I

COURSE NAME	D.F.	CREDIT
Automated Accounting (40001)	1.4	1.0

This third year accounting course prepares students to apply the knowledge gained from Accounting I and Advanced Accounting in an automated system using QuickBooks Online. Students will be guided through QuickBooks Online to learn how to set up a business's accounting system, resolve accounting issues, and generate valuable accounting reports. In addition to learning one of the most widely-used accounting programs in the business world, students may also have the opportunity to become a QuickBooks Certified User (QBCU) by taking an official Certiport exam. Passing this exam earns students a certification that validates skills necessary for an entry-level accounting position.

Recommended Grade: 12th

Prerequisite: successful completion of Accounting I, Advanced Accounting, and Instructor recommendation.

	AUTOMOTIVE PROGRAM COMPLETION
10th Grade	Level 1 Automotive Technology
11th Grade	Level 2 Automotive Technology
12th Grade	Level 3 Automotive Technology

COURSE NAME	D.F.	CREDIT
L1 Automotive Technology (91550)	1.2	2.0

This course is designed for students planning to pursue a career in the automotive service industry. Students will first learn about shop safety and how to maintain a safe work environment. Emphasis will be placed on the understanding of a vehicle's brake system, and will include disassembly, cleaning, inspection, measurement, reassembly, and diagnosis. Students will learn the correct use of service information, basic tools, equipment and other industry standards. Along with this, students will also learn how to service and maintain their own automobile including routine maintenance such as oil changes, fluid inspection and top off, tire inspection, tire rotation, and chassis lubrication. Completion of this course will provide students with the prerequisite knowledge and skills for the next level of more in-depth coverage in Level 2 Automotive Technology (91590). *Recommended grades: 10th*

COURSE NAME	D.F.	CREDIT
L2 Automotive Technology (91560)	1.3	2.0

This course is designed for students interested in a career in automotive technology. Instruction will provide students with the knowledge and skills needed to repair and maintain internal combustion engines on vehicles and mobile equipment. Instruction also includes the use of technical manuals, state inspection code, and aspects of hydraulics, electricity, and fluid power. *Prerequisite(s): Level 1 Automotive Technology*

COURSE NAME

L3 Automotive Technology (91570)

D.F. CREDIT

2.0

This is an advanced level course. Students in this class will develop solid mechanical, technical, and systems diagnostics skills. Topics covered will be live hands on activities dealing with Electronics, Advanced Electronics, and Engine Performance. Vehicle computer systems and how they relate / interact with the mechanical parts of the engine will be covered in the course as well. Accessing vehicle repair, diagnostics information as well as Technical Service Bulletins (TSB) from an Internet based site will be applied in the lab setting. Electricity/Electronics, Engine Performance as well as more advanced Brakes, Steering and Suspension will be taught over the course of the year. Students will have the opportunity to take the student Electricity/Electronics and Engine Performance student ASE test at the end of the course.

Students will have the opportunity to acquire their Pennsylvania State Safety Inspection License as well as their Pennsylvania Emissions License.

Emphasis of this course will be using skills in a practical, real world setting. Students will be put into a variety of roles that will prepare them for the work world. Leadership, working in small groups, taking charge and following the job until completed will be stressed.

Specialized skill will be honed to accommodate student specific interest in the transportation field. It will aid students in the decision making process of either going into the field or continuing their career objective in a postsecondary technical school. *Prerequisite(s): Level 2 Automotive Technology*

BIOTECHNOLOGY PROGRAM COMPLETION		
10th Grade	L1 Biotechnology	
11th Grade	L2 Biotechnology	
12th Grade	L3 Biotechnology	

COURSE NAME	D.F.	CREDIT
L1 Biotechnology (91610)	1.2	2.0

This course is the first of three in the Biotechnology Career and Technology Education program. The course focuses on the application of the biological sciences such as cell biology, microbiology, biochemistry, and genetics in preparation of new and enhanced agricultural, environmental, clinical and industrial products including the commercial exploitation of microbes, plants and animals. Students in this course will experience the procedures, methods, and equipment common to most biotechnology laboratories. Students will use state of the art equipment to learn the principles of scientific investigation as applied to medicine, forensics, agriculture, genetic engineering and environmental health.

This program prepares students for occupations such as pharmacy technician, radiological technician, biomedical engineering, forensic scientist, geneticist, clinical researcher and phlebotomist in addition to a wide range of healthcare occupations.

Topics covered at this level include a history of the biotechnology industry, career exploration, basic biology & chemistry, introductory biotechnology lab skills, microbiology, bacteria cell cultures, epidemiology and basic forensic science.

Recommended Grades: 10th

COURSE NAME	D.F.	CREDIT
L2 Biotechnology (91620)	1.3	2.0

Course Description

This course is the second of three in the Biotechnology Career and Technology Education program. Students in this course will continue to refine their biotechnology laboratory skills and utilize the protocols learned in the previous course to complete more advanced experimental studies.

Topics covered in this course include a study of DNA structure & analysis via gel electrophoresis and plasmid mapping, bacterial transformation & plasmid purification, polymerase chain reaction (PCR) & DNA replication and advanced forensic science. Additionally, students will begin to explore and debate the ethical implications of biotechnology in the 21st century.

Prerequisite(s): Level 1 Biotechnology

COURSE NAME	D.F.	CREDIT
L3 Biotechnology (91630)	1.4	2.0

Course Description

This course is the third of three in the Biotechnology Career and Technology Education program. Students in this course will apply their biotechnology laboratory skills and will utilize the protocols learned in the previous courses to complete more advanced experiments including an independent research project.

Topics covered in this course include a study of protein structure & protein analysis and a study of research tools & techniques. Students will conclude their biotechnology career and technology education by preforming an independent research project.

Prerequisite(s): Level 2 Biotechnology

	BUSINESS ADMINISTRATION PROGRAM COMPLETION		
10th	Computer Applications I & II

^{*}ACCOUNTING COURSES ARE DESCRIBED ABOVE

COURSE NAME	D.F.	CREDIT
Computer Applications I (40071)	1.1	.50

Computer Applications I is a hands-on course that teaches students the power (and tricks) to Microsoft Word, Excel and PowerPoint. This is a "learn by doing" experience. Students will work on exercises and projects to master the tools of the applications in the lab. These experiences are designed to teach students competencies needed to achieve MOS (Microsoft Office Specialist) Certification. These tools will help you in many other classes and in life! *Recommended Grades:* 9th-12th

COURSE NAME	D.F.	CREDIT
Computer Applications II (40072)	1.1	.50

Computer Applications II is a half-year course that will compliment Computer Applications I. The course will continue with more advanced Microsoft Office exploration. Students may also learn other programs including Access and Publisher to become skilled at using a database and completing desktop publishing activities. These experiences are designed to teach students competencies needed to achieve MOS (Microsoft Office Specialist) Certification. Additionally, students may create their own movies using the program Movie Maker.

Recommended Grades: 9th-12th

Prerequisite(s): Successful completion of Computer Applications

COURSE NAME	D.F.	CREDIT
Intro to Business (4009X)	1.0	.50

Students taking this course will receive a comprehensive survey of business. This is a great introductory course that will prepare students for the workplace and is the foundation to additional business based curriculum. Students study the economic environment, business structures, goods and services, marketing, social media and e-business. Contemporary topics highlighted within these areas include ethics, small business concerns and entrepreneurship, global issues, green and socially responsible business, and sustainability.

Grades: 10-12thOnly

COURSE NAME	D.F	CREDIT
Business Law (4061X)	1.0	.50

This half-year course will explore the concepts of contractual agreement in the law. Topics will include offer and acceptance of contracts, genuine agreement in a contract, contractual capacity, sales contracts, consumer protection, employment laws, banking laws (commercial paper) and bankruptcy laws. Hands on projects and case studies are conducted throughout the semester. Students can also participate in a field trip to the courthouse to see a real live court case in action. Any student who wishes to learn about contractual obligations in business should schedule this course. In addition, this course is also invaluable for those wishing to major in law enforcement, legal studies or business at the post-secondary level.

Grades: 10-12thOnly

COURSE NAME	D.F.	CREDIT
Personal Finance (4010X)	1.1	.50

Personal Finance explores personal money management. As we recover from the worst recession since the Great Depression, it is important to understand the fundamental concepts of finances and how we can protect our money if another crisis were to occur. Every student would benefit from the knowledge learned in this class. Topics explored during this half-year course are: (1) making money, (2) living on your own, (3) saving money, (4) banking, (5) credit & debit cards, (6) budgeting, (7) creditworthiness, (8) saving for college, (9) buying a car, (10) renting/buying a home, (11) employment benefits, (12) marriage finances, (13) retirement income.

Grades: 11-12th Only

COURSE NAME	D.F.	CREDIT
Entrepreneurship (40002X)	1.3	.50

Entrepreneurship is available to juniors and seniors with an interest in starting/owning their own business. Essential elements in the course will include developing a unique business idea and drafting a complete business plan, to include a product/service/plan, management and organization plan, marketing plan, and a financial plan.

Prerequisite(s): Introduction to Business, Accounting I

Grades: 11-12th Only

COURSE NAME	D.F.	CREDIT
Computer Programming I (41610)	1.2	1.0

Computer Programming I is an introduction to computer programming for the beginner. The course includes how computers function, how they are controlled, their applications, and how they are used in problem solving. Topics include hardware, software, pseudo-code, and structured programming using a microcomputer.

NOTE: This course should not be elected in place of a mathematics course.

Prerequisite(s): Algebra II Grades: 10-12thOnly

COURSE NAME	D.F.	CREDIT
Business Management I (40430)	1.2	1.0

This course introduces students to business management responsibilities. The course begins with a review of business structures and the business environment. Concepts related to management such as philosophies, leadership, effectiveness, decision-making, planning, organizing, implementing, controlling, social and ethical issues, and the international environment are studied. Students will also demonstrate and utilize business communications skills such as technical writing, formal presentations, business correspondence, and meeting management.

Grades: 11-12thOnly

COURSE NAME	D.F.	CREDIT
Business Management II (40440)	1.3	1.0

This course continues the study of business management. Using the concepts learned from Business Management I as a foundation students explore specific management areas such as financial management, production and marketing management, and human resources management. Real world case studies of business management mistakes and successes are also explored. Students will also demonstrate and utilize business skills such as technical writing, formal presentations, inventory control, research & analysis, and data & spreadsheet preparation.

Prerequisites(s): successful completion of Business Management I

Grades: 12th Only

^{*}OTHER COURSES LISTED UNDER ACCOUNTING

COURSE NAME D.F. CREDIT L2 Commercial Art (91960) 1.4 2.0

Design skills are used in the areas of advertising and design, illustration, page layout, computer graphics and digital photography. Students will continue to enhance drawing skills and be introduced to various drawing mediums. *Prerequisite(s): Level 1 Commercial Art.* 3 Credits

COURSE NAME	D.F.	CREDIT	Penn College
L3 Commercial Art/PCT Now Art 145 (91XXX)	1.4	2.0	NOW DUAL ENROLLMENT

In addition to continuing the study of design and enhancing learned skills, students will study digital photography, color separation, digital file preparation and output, and portfolio preparation. Students will learn intermediate and advanced components of Adobe's graphic design software. Students will take the PA NOCTI Exam, 6932, at the end of their senior year where they may earn state certification that qualifies for college credit at participating Pennsylvania colleges. Students may further have opportunities to participate in job shadowing experiences and the school co-op program. *Prerequisite(s): Level 2 Commercial Art.* 3 Credits

*Qualifying students may also earn college credit for the Pennsylvania College of Technology's ART 145: History of Graphic Design course. This course studies the history of graphic design and of the ways in which the past will help students better understand current and future design applications. Emphasis on research of different design movements, such as the Victorian and Art Nouveau Graphics, Postmodern Design, the Arts and Craft Movement, and the computer graphics revolution.

*As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

	COMPUTER INFORMATION TECHNOLOGY PROGRAM
10th Grade	L1 CIT- Computer Repair (Computer Information Technology)
11th Grade	L2 CIT- Networking- Intro to Networking
12th Grade	L3 CIT- Networking II

COURSE NAME	D.F.	CREDIT
L1 CIT- Computer Repair (92950)	1.2	2.0

This course is designed to give students the skills needed to troubleshoot, repair, upgrade, and maintain computer systems. Students who take this course will develop a solid base foundation for a career within the Information Technology industry. Students learn about all aspects computer components such as installation, configuration, maintenance, and troubleshooting. Networking fundamentals, laptop hardware, printer configuration and maintenance, operating system installation and configuration, security methods, mobile devices, and troubleshooting methods are also covered in this level 1 course. Students taking this course will have the opportunity to prepare for and possibly take the CompTIA A+ certification exam.

Recommended Grades: 10th-12th

COURSE NAME	D.F.	CREDIT
L2- CIT- Networking (92920)	1.3	2.0

This course is designed to give students the skills needed to troubleshoot, repair, upgrade, and maintain network systems. *This course focuses on the f*undamental concepts of operation, installation, and configuration of the hardware and operating system software for computer networks. Network topologies, protocols, cabling systems, and server operating system software installation and service configuration are covered, with an emphasis on entry-level skills for network professionals. Students taking this course will have the opportunity to prepare for and possibly take the CompTIA Network+ certification exam. (4 Credits)

Prerequisite(s): Successful completion of L1 CIT – Computer Repair

Recommended Grades: 11th-12th

COURSE NAME	D.F.	CREDIT
L3 CIT – Networking II (92970)	1.4	2.0

This course is designed to develop, strengthen and extend the computer repair and networking skills students acquired in the L1 and L2 Computer Information Technology courses. The first two semesters of this course will focus on more in depth networking skills and concepts, which include, but are not limited to, server management, network security, and WAN technologies. The last two semesters of this course focus on industry certification preparation and project based learning opportunities such as job shadowing, internship, employment or community service.

Prerequisite(s): Successful completion of L2 CIT – Networking

Recommended Grades: 12th

CONSTRUCTION TRADES PROGRAM COMPLETION (CIP 52.0701)		
10th Grade	PCT L1 Construction Trades	
11th Grade	L2 Construction Trades/PCT AutoCad	
12th Grade	L3 Construction Trades/PCT AutoCad	

COURSE NAME	D.F.	CREDIT	Penn College
PCT L1 Construction Trades (91010)	1.4	2.0	NOW DUAL ENROLLMENT

This course is the first in a series of three in the Construction Trades Career and Technical Education program. The course will give students the opportunity to learn and master skills relevant to the standards of the construction industry. Areas covered in level 1 are hand and power tool safety, construction math, blueprint reading, site layout, block laying, concrete finishing and framing with an emphasis on rafter layout and stairs.

This course is taught in accordance with Pennsylvania College of Technology's *BCT103*: Construction Hand and Power Tools. This course is a survey of hand and power tools typically used to perform construction work. Emphasis on the development of the skills needed to effectively perform layout, measurement, cutting, fastening, and finishing operations. Study also includes maintenance of tools and equipment, safe use of hand tools, and emerging tool technology. (1 Credit) *Recommended grades*: 10th

*As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

COURSE NAME	D.F.	CREDIT	Penn College
L2 Construction Trades (91040)	1.3	2.0	NOW DUAL ENROLLMENT

This course is for students enrolled in the Construction Trades CTE program and is divided into two main components: Residential Structures and Utilities and Structural Finishing. In Residential Structures, the students will learn and practice the skills and techniques used in the construction of residential homes. Floor, Wall, Ceiling, and Advanced Roof Framing along with Interior and Exterior finishing will be covered. In Utilities and Structural Finishing, the students will learn and practice the skills and techniques used for installation of utilities and finish work in residential structures. Practical hands-on experience will be gained in electrical and plumbing aspects of residential construction

Prerequisite(s): Level 1 Construction Trades and passing of OSHA 10 Certification in L1

- * This course is taught in accordance with Pennsylvania College of Technology's *BCT109*: *Framing Principles*. Theory and application of framing techniques in residential and light commercial construction. Emphasis on basic principles and skills used in hand and machine woodworking operations. (4 Credits)
- *As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

COURSE NAME	D.F.	CREDIT
L3 Construction Trades (91050)	1.4	2.0

This is an advanced level course for career and technical students enrolled in the Construction Trades program. Students will learn and practice skills in masonry, carpentry, electrical wiring and plumbing to prepare for the state competency evaluation.

Prerequisite(s): Level 2 Construction Trades and passing of OSHA 10 Certification in L2 if not complete in L1 for some reason

CULINARY ARTS PROGRAM COMPLETION		
10th Grade	L1 Culinary Arts	
11th Grade	L2 Culinary Arts	
12th Grade	L3 Culinary Arts	

COURSE NAME	D.F.	CREDIT
L1 Culinary Arts (80110)	1.2	2.0

Level 1 Culinary Arts is an introductory course designed for students interested in the food and hospitality industry. Students will gain hands on experience learning the skills and knowledge needed to be successful in the food and hospitality industry. Students will learn and practice basic safety and sanitation, cooking methods, service techniques, and possible employment opportunities.

Recommended grades: 10th

COURSE NAME	D.F.	CREDIT
L2 Culinary Arts (80120)	1.3	2.0

Instruction in Level 2 Culinary Arts is designed to advance students practice in the food and hospitality industry. Based on Level 1 Culinary Arts students will continue to prepare for culinary school and or post-secondary school employment in the food and hospitality industry. Students will experience different phases of the kitchen brigade while operating the Millionaire Café and catering other events in the school. Students will prepare a career portfolio for use after graduation as well as complete an extensive management project covering all aspects of the food and hospitality industry. *Prerequisite(s): Successful completion of Level 1 Culinary Arts.*

 COURSE NAME
 D.F.
 CREDIT

 L3 Culinary Arts (80130)
 1.4
 2.0

Level 3 Culinary Arts practices mastery of running a successful kitchen and dining room. Upon completion of this course students will be able to solely plan and manage their own Millionaire Café. Requirements include planning, purchasing, managing, production, service, costing, safety and sanitation. Students will also focus on a wide variety of baking techniques and methods used in the food and hospitality industry.

Prerequisite(s): Successful completion of Level 2 Culinary Arts.

EARLY CHILDHOOD EDUCATION PROGRAM COMPLETION				
10th Grade	L1 Early Childhood			
11th Grade	L2 Early Childhood			
12th Grade	L3 Early Childhood			

COURSE NAME	D.F.	CREDIT
L1 Early Childhood Ed (804101)	1.2	1.0

This is the first in a series of three-year courses for the Early Childhood Career and Technical Education program. The topics covered in this course are health and safety in the childcare setting and principles of child development and learning.

Recommended grades: 10th

COURSE NAME	D.F.	CREDIT
L2 Early Childhood Ed (80420)	1.3	2.0

This is the second in a series of three-year courses for the Early Childhood Career and Technical Education program. The topics covered in this course are advancing children's physical and intellectual development, supporting children's social and emotional development, managing a childcare program, and observing and recording children's behavior. This course also includes hands-on experiences with young children in a laboratory pre-school setting.

Prerequisite(s): Level 1 Early Childhood Education

COURSE NAME	D.F.	CREDIT
L3 Early Childhood Ed (80430)	1.4	2.0

This is the third in a series of three-year courses for the Early Childhood Career and Technical Education program. The topics covered in this course are strategies to establish productive relationships with families and maintaining a commitment to professionalism.

This course is an overview of typical growth and development of young children from birth to age eight. Cognitive, language, physical growth, gross and fine motor, emotional and social developmental milestones are the focus of this course, with a special emphasis on the implications they have for the care and education of young children. Other topics include an introduction to the basic concepts of major developmental theories; principles of learning and development; and developmentally appropriate practice. A strong focus on a family-centered approach is integrated throughout the course *Prerequisite(s): Level 2 Early Childhood Education*

ENGINEERING/ROBOTICS PROGRAM COMPLETION			
9th Grade	Intro to Engineering & Robotics		
10th Grade	L1 PCT Engineering & Robotics		
11th Grade	L2 Engineering & Robotics		
12th Grade	L3 Engineering & Robotics		

COURSE NAME	D.F.	CREDIT
Intro to Engineering & Robotics (91150)	1.0	0.50

This course is designed to introduce students to the different topics that are covered in the Engineering and Robotics Program of Study. Topics covered include: engineering career choices, robotics, microcontrollers, PLC programming, drafting, motor control, measurement, and basic electrical theory.

Prerequisite(s): Successful completion of Algebra I

Recommended grade(s): Grade 9th.

COURSE NAME	D.F.	CREDIT	Penn College
L1 PCT Engineering & Robotics (91160)	1.4	2.0	NOW DUAL ENROLLMENT

This course is the first of three double-period courses required for the completion of the CTE Engineering and Robotics program. This course will introduce students to a broad range of engineering technology topics such as programming, robotics, magnetism, motors and AC and DC circuit analysis. The fundamental skills and knowledge required in many types of careers in the electronics/electrical engineering technology fields will be discussed, including the technologies utilized in industry. Emphasis on the importance of ethical behavior and responsible attitude in the workplace is also a component of the course. A strong background in math, science, and technical writing will increase the student's success.

Prerequisite(s): Successful completion of Algebra I

*Course is taught in accordance with Pennsylvania College of Technology's *EET 124: Introduction to Engineering Technology*. Introduction to the basic concepts and applications of computer and engineering technologies and the effects on professional and casual users, their employers and employees, and society. Applied skills include the use of current computer technology for data/information collection and organization; visualization, analysis, and interpretation of numeric computations; and the dissemination and presentation of solutions to engineering technology problems.

*As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

COURSE NAME	D.F.	CREDIT
L2 Engineering & Robotics (91170)	1.3	2.0

This course is the second of three double period courses required for the completion of the CTE Engineering and Robotics program. This course begins where Level 1 Automation and Controls ended. Students will learn AC and DC circuit analysis, computer circuit simulation, robotics, capacitance, pneumatics, hydraulics, motor control, PLC programming, mechanical drives, and digital electronics.

Prerequisite(s): Successful completion of L1 Engineering and Robotics

COURSE NAME		D.F.	CREDIT
L3 Engineering & Robotics (91180)		1.4	2.0

This is the final course required for the completion of the CTE Engineering and Robotics program. In this course, students will learn process control, the integration of different systems, drafting skills, project organization, robotics, and microcontrollers. Students will also work together to design and create a class project that incorporates many of the skills learned throughout the 3 levels of Engineering and Robotics.

Prerequisite(s): Successful completion of L2 Engineering and Robotics

HEALTH CAREERS PROGRAM COMPLETION			
10th Grade	L1 Health Professions		
11th Grade	L2 Health Professions/Anatomy & Physiology		
12th Grade	L3 Health Professions/Anatomy & Physiology		

COURSE NAME	D.F.	CREDIT
L1 Health Professions (92060)	1.2	2.0

This is the first in a series of three- year courses for the Health Professions Career and Technical Education program. The topics covered in this course include: Promotion of Safety, History and Trends of Health Care, Health Care Systems, Careers in Healthcare, Personal and Professional Qualities of a Health Care Worker, Legal and Ethical Responsibilities in Health Care, Computers and Technology in Health Care, Human Growth and Development, Cultural Diversity, Nutrition and Diets, and Introduction to Infection Control. Medical Terminology will be embedded within this course as it relates to the topics covered.

COURSE NAME	D.F.	CREDIT
L2 Health Professions (92070)	1.3	2.0

This is the second in a series of three-year courses for the Health Professions Career and Technical Education program. The topics covered in this course include: Anatomy and Physiology of the Human Body, Geriatric Care, Medical Math, Vital Signs, and First Aid and Infection Control. Medical Terminology will be embedded within this course as it relates to the topics covered. *Recognizing & Reporting Child Abuse Certification and PA DHS Personal Home Care Direct Training/Adult Residential Care Licensing will be available during the course.

Prerequisite: Successful completion of Level I (Intro) Health Professions

COURSE NAME	D.F.	CREDIT
L3 Health Professions (92080)	1.4	2.0

This is the third in a series of three-year courses for the Health Professions Career and Technical Education program. The topics covered in this course are directly related to specific career pathways including: Dental Assistant Skills, Laboratory Assistant Skills, Medical Assistant Skills, Nurse Assistant Skills, Physical Therapy Skills, and Business and Accounting Skills. Preparing for the World of Work is also presented which includes cover letters, developing a resume, completing job application forms, job interviewing skills, determining net income and calculating/balancing a budget. *OSHA 10-Hour General Industry (Health Care) Certification and AHA Health Care Provider CPR Certification will be available during this course.

Prerequisite: Anatomy and Physiology and Successful completion of Levels I and II Health Professions

	HOMELAND SECURITY PROGRAM COMPLETION		
9th Grade	Introduction to Homeland Security		
10th Grade	L1 Homeland Security		
11th Grade	LI Homeland Security		
12th Grade	LI Homeland Security		

COURSE NAME	D.F.	CREDIT	
Introduction to Homeland Security (9700X)	1.0	0.50	
This course offers instruction in the basic components of the homeland security industry. This includes emergency			

This course offers instruction in the basic components of the homeland security industry. This includes: emergency services, fire protection, and criminal justice specific to emergency and disaster situations.

Recommended Grade: 9th

COURSE NAME	D.F.	CREDIT
L1 Homeland Security (97110)	1.2	2.0

This is the first in a series of three-year courses for the Homeland Security Career and Technology Education program. This program stresses the techniques, methods and procedures specific to the areas of criminal justice and fire protection especially in emergency and disaster situations.

Physical development and self- confidence skills are emphasized due to the nature of the specific occupation(s). In addition to the application of mathematics, communication, science and physics, students receive training in social and psychological skills, map reading, vehicle and equipment operations, the judicial system, pre-hospital emergency medical care and appropriate emergency assessment, treatment and communication.

This program prepares students to apply technical knowledge and skills required to perform entry-level duties in law enforcement, firefighting, EMT and other safety services.

Recommended Grade: Grade 10th, 11th, or 12th

COURSE NAME	D.F.	CREDIT
L2 Homeland Security (97130)	1.3	2.0

This is the second in a series of three-year courses for the Homeland Security Career and Technology Education program. This program stresses the techniques, methods and procedures specific to the areas of criminal justice and fire protection especially in emergency and disaster situations. L2 Homeland Security will teach Law Enforcement techniques that are used when responding to emergency calls, conducting traffic stops, and performing crime scene investigations.

Physical development and self-confidence skills are emphasized due to the nature of the specific occupation(s). In addition to the application of mathematics, communication, science and physics, students receive training in social and psychological skills, map reading, vehicle and equipment operations, the judicial system, pre-hospital emergency medical care and appropriate emergency assessment, treatment and communication.

This program prepares students to apply technical knowledge and skills required to perform entry-level duties in law enforcement, firefighting, EMT and other safety services.

Prerequisite: Successful completion of Level I Homeland Security

JOB SEEKING PROGRAM	
12th Grade	Capstone Co-op
	Workplace Readiness
	Diversified Occupations Co-op

COURSE NAME	D.F.	CREDIT
Workplace Readiness (93500)	1.0	1.0

Workplace readiness is a one-credit course for those students that have a part-time job during the school day. Emphasis will be placed on two areas; getting a job (acquisition) and maintaining your job (retention).

Job acquisition documents will include, but will not be limited to; job applications, letters of appreciation following an interview, letters of introduction, postsecondary education applications, request for letters of recommendations, and resume writing.

Learning how to maintain your job (retention) will focus on personal attitudes and work habits that support career retention and advancement along with conflict resolution skills

The outcome of the class will incorporate a career portfolio of all assigned classroom projects.

Students participating in a Capstone Cooperative Education are not eligible to take this class.

Prerequisite(s):(Must be enrolled in the class entitled Diversified Occupations)

COURSE NAME	D.F.	CREDIT
Diversified Occupations Co-on (93211)	1.0	.50

Diversified Occupations is an education program that combines classroom instruction with on-the-job training in a career area of the student's choice. This unique program of education is designed to integrate classroom study in employability and life skills with planned, supervised, practical work experience. Students enrolled in Diversified Occupations must also be enrolled in the class entitled Workplace Readiness.

The Diversified Occupations Program is a partnership between local businesses and the high school. Career competencies are developed at the job-training site. Related classroom theory is taught in the class entitled Workplace Readiness. Diversified Occupations serves groups of students whose career objectives cannot be met by attending any of the CTE programs offered at the local comprehensive high school or cannot find a spot in one of the CTE courses due to over enrollment.

Prerequisite(s):(Must be enrolled in the class entitled Workplace Readiness)

COURSE NAME	D.F.	CREDIT
Capstone Co-op (93321)	1.0	.50

Cooperative education is a structured method of combining classroom-based education with practical work experience. Research indicates that employer's value job experience in their newly hired workers. A cooperative education experience, commonly known as a "co-op", provides academic credit for structured job experience. Cooperative education is taking on new importance in helping young people to make the school-to-work transition.

CTE students are eligible for "Capstone Co-op" experiences if they have met the following criteria:

- Be in one of WAHS's approved CTE programs.
- In line to be a CTE completer by the end of their senior year.
- A senior in good academic standing.
- Have good attendance.
- Have transportation to and from their work site.

Capstone Co-op students spend part of the school day in school taking classes required for graduation. The remainder of the day is spent at a work site doing a paid job experience related to their CTE area of study.

PRECISION MACHINING PROGRAM COMPLETION		
9th Grade	Intro to Precision Machining	
10th Grade	L1 Precision Machining/PCT AutoCad	
11th Grade	L2 Precision Machining/PCT AutoCad	
12th Grade	L3 Precision Machining/PCT AutoCad	

COURSE NAME	D.F.	CREDIT
Intro to Precision Machining (9270X)	1.0	0.50

This introduction class is a short-term opportunity for students to gain the advantage of having a year of experience in the shop prior to entering L1 Precision Machining. Students will learn the basics of how to use grinders, operate lathes and milling machines, cut metal with a torch, hammer iron as blacksmiths do, etc. Each year we make a different set of projects- but generally students are encouraged to be creative and apply what they've learned toward making projects that are personally rewarding and interesting.

Recommended Grades: 9th

Ī	COURSE NAME	D.F.	CREDIT
Ī	L1 Precision Machining (92730)	1.2	2.0

Level 1 Precision Machining is the first of three levels designed to prepare students for a variety of careers in manufacturing or engineering by learning how to operate and program metalworking machines to produce complex, highly detailed parts. The following are examples of fields students might choose to pursue following program completion: manufacturing/production, machinery maintenance & repair, production/manufacturing/process engineering, machinist/tool & die maker, prototype development, machine design, CNC programmer, etc. Many of the skills students learn in this program can be applied in a wide variety of career areas, an added bonus in tough economic times. Students will learn to operate various lathes, mills, drills, saws and grinders to produce accurate parts according to blueprint dimensions. Students will also gain exposure to CNC machining and other metalworking processes (on a limited basis) such as welding, forging and foundry operations. Students will constantly utilize reference materials and formulas to solve practical problems in the shop. Students will apply a variety of complex, precise tools to measure parts down to one ten-thousandth of an inch! Program completion will require students to make certain parts to specifications developed by the National Institute of Metalworking Skills (NIMS), as well as to take proctored online exams through NIMS. These are nationally recognized, industrial credentials, earned while in high school.

Recommended Grades: Grade 10th

COURSE NAME	D.F.	CREDIT
L2 Precision Machining (92740)	1.3	2.0

Level 2 will focus on more advanced operation of machine tools toward the completion of NIMS credentials. Students will use CAD-CAM software (Solidworks, AutoCAD, & Fusion 360) and gain more experience with CNC machine tools. At this level students will be comfortable with most of the machines in the shop and are encouraged to create complex projects, mechanisms, jigs and fixtures, etc.

Prerequisite(s): Successful Completion of L1 Precision Machining

COURSE NAME	D.F.	CREDIT
L3 Precision Machining (92750)	1.4	2.0

Level 3 will focus on completing more NIMS credentials and when possible, preparing students for a particular field of interest, since the curriculum can be applied to so many different industries. Students showing a particular interest in a field of study will be encouraged to apply the curricular goals of the program toward applications common to that industry in preparation for employment. Our Advisory Committee has expressed a great deal of interest in recruiting qualified students for positions of local employment within the manufacturing industry. Opportunities for jobshadowing, apprenticeships and earning college credit in exchange for NIMS credentials can be a reality for those who strive to achieve the most from this program.

Prerequisite(s): Successful Completion of L2 Precision Machining

	WELDING PROGRAM COMPLETION
10th Grade	L1 PCT Welding
11th Grade	L2 PCT Welding/PCT AutoCAD
12th Grade	L3 PCT Welding/PCT AutoCAD

COURSE NAME	D.F.	CREDIT	Penn College
L1 PCT Welding Technology (92510)	1.4	2.0	NOW DUAL ENROLLMENT

This course is designed to offer students basic skills of welding. Covered in this introductory course will be oxygen/acetylene welding, cutting, plasma arc cutting and grinding. Safe procedures and work habits used in the welding industry are taught and required from the students.

Recommended Grades: Grade 10th.

*Course is taught in accordance with Pennsylvania College of Technology's WEL114/116: Shielded Metal Arc I & II. WEL114: Introduction to the principles and practices of basic Shielded Metal Arc Welding (SMAW) using various types of mild steel electrodes in multiple positions with emphasis put on the flat and horizontal positions. The fundamentals of AC and DC current and various types of power sources are covered. (2 credits) WEL116: The theory introduced in WEL 114 will be applied in this course. Development of practical hands-on techniques with various power sources using AC and DC current in multiple positions with the emphasis on the flat and horizontal positions. (2 credits).

**As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

COURSE NAME	D.F.	CREDIT	Penn College
L2 PCT Welding Technology (92520)	1.4	2.0	NOW DUAL ENROLLMENT

This course is designed to build on the principles that were taught in Welding I (92510). The students will weld both ferrous and nonferrous metals with this process and will learn how to correctly weld joints of different configurations, while it is in different positions (flat, horizontal, vertical, overhead). Other covered areas of welding include, blueprint reading and weld symbols. Safe procedures and work habits used in the welding industry are taught and required from the students. (Dual enrollment for grades 11 and 12 only)

Prerequisite(s): Level 1 Welding Technology.

- * Course is taught in accordance with Pennsylvania College of Technology's WEL120/124: Gas Metal Arc I & II. WEL120: Principles and applications of Gas Metal Arc Welding (GMAW) applied to various metals. An introduction to single and multi-pass welds using a variety of electrode wire types, diameters, and transfer modes. (2 credits) WEL124: Continued laboratory practice of Gas Metal Arc Welding (GMAW) introduced in WEL120. Activities include fundamental applications on ferrous metals in all positions using various modes of metal transfer and wire electrodes. (2 credits).
- **As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

COURSE NAME	D.F.	CREDIT	Penn College
L3 PCT Welding Technology (92530)	1.4	2.0	NOW DUAL ENROLLMENT

This course is designed to build on the principles that were taught in Welding I (92510) and Welding II (92520), and will incorporate the welding processes that most industries demand. The students will weld both ferrous and nonferrous metals with these processes and will learn how to correctly weld joints of different configurations, while it is in different positions (flat, horizontal, vertical, overhead). Other covered areas of welding include, blueprint reading and weld symbols. Also covered procedures will include Submerged Arc Welding (SAW) and Air Carbon Arc Cutting (CAC-A). Safe procedures and work habits used in the welding industry are taught and required from the students. *Prerequisite(s): Level 2 Welding Technology*.

* Course is taught in accordance with Pennsylvania College of Technology's WEL123/129: Gas Tungsten Arc I & II. WEL123: Introduction to the Gas Tungsten Arc Welding (GTAW) process. Theory is applied to related equipment, electrical concepts, material properties, arc characteristic, puddle control, and appropriate application of filler materials. Welding of ferrous and non-ferrous metals in all positions is covered. (2 credits)

WEL129: Laboratory activities, with emphasis on the welding of ferrous and non-ferrous metals in various joint configurations. Welding will be done using all positions. Joining dissimilar metals and metal identification is covered. (2 credits)

**As a dual enrollment course, students must adhere to all Penn College NOW course expectations and demonstrate proficiency in reading.

Fine and Performing Arts Department

Music Department Course Requirements

All students may elect any course for which they are qualified and meet the prerequisites. Public performance is an important part of all ensemble classes. **Attendance is required** at all special rehearsals and scheduled performances.

Course Descriptions: CURRICULAR MUSIC

All students may elect any course for which they are qualified and meet the prerequisites. Public performance is an important part of all ensemble classes. Attendance at all special rehearsals and scheduled performances is required.

WAHS Choral Music

WAHS choral music is divided into ten performance offerings. Placement auditions are held annually before course selection. Concert performances throughout the year include fall, winter and spring concerts, an annual holiday concert and the all-district honors concert. All choir members are eligible to audition for co-curricular ensembles and festival choruses. Students wishing to participate in both instrumental and chorale ensembles will be scheduled into Performing Music. The students will be "shared" on a rotating basis by both the choral and instrumental teachers.

Freshman Chorale (60140)

Grade 9 1.0 credit

Performing Music 9, Chorale-Orchestra (60280)

Grade 9 1.0 credit

Performing Music 9, Chorale-Band (60290)

Grade 9 1.0 credit

Concert Chorale (60150)

Grades 9 & 10 1.0 credit

Concert Choir (60120)

Grades 11 &12 1.0 credit

Men's Choir (60170)

Grades 10, 11 & 12 1.0 credit

Women's Choir (60160)

Grades 10, 11 & 12 1.0 credit

Performing Music 10-12, Choir-Orchestra (60420)

Grades 10, 11 & 12 1.0 credit

Performing Music 10-12, Choir-Band (60430)

Grades 10, 11 & 12 1.0 credit

COURSE NAME	D.F.	CREDIT
Freshman Choir (60140)(60280)(60290)	1.0	1.0

The Freshman Choir is designed to prepare students for the following choirs: Men's Choir, Women's Choir, Concert Chorale, and Concert Choir. Students wishing to participate in both instrumental and choral ensembles will be shared on a rotating basis. The ensemble concentrates on the essentials of choral singing which include: tone, vowel placement, changing voice, ensemble singing, leadership, blend, dictation, dynamics, posture, and musicianship.

COURSE NAME	D.F.	CREDIT
Concert Chorale (60150)	1.4	1.0

Concert Chorale is for select students 9th and 10th grade is committed to the excellent performance of great choral masterworks from standard to repertoire. Combined with the Concert Choir, these ensembles make numerous appearances throughout the year at local concerts, college campuses, as well as regional and national performing events.

COURSE NAME	D.F.	CREDIT
Men's Choir (60170)	1.0	1.0

Comprised of singers 10-12, members will focus on continuing their vocal development, focusing on skills listed above and improving their skill level of performance. Students wishing to participate in both instrumental and choral ensembles will be shared on a rotating basis. The choir performs music from all styles ranging from classical to popular.

COURSE NAME D.F. CREDIT Women's Choir (60160) 1.0 1.0

Comprised of singers 10-12, members will focus on continuing their vocal development, focusing on skills listed above and improving their skill level of performance. Students wishing to participate in both instrumental and choral ensembles will be shared on a rotating basis. The choir performs music from all styles ranging from classical to popular.

COURSE NAME	D.F.	CREDIT
Concert Choir (60120)	1.4	1.0

Concert Choir is for select students in 11th and 12th grade. It is committed to the excellent performance of great chorale masterworks from standard repertoire. Combined with Concert Chorale, these ensembles make numerous appearances throughout the year at local concerts, college campuses, as well as regional and national performing venues.

WAHS Orchestras

WAHS has three orchestras to meet the skills and interests of string instrumentalists. Concert performances throughout the year include Fall and Spring Concerts, an Annual Holiday Concert, the All-District Honors Concert and PMEA Festival participation. All students are expected to participate in rotating, large group lessons unless they are studying privately. Any student who has had experience performing on a string instrument is encouraged to participate. Placement auditions are held annually before the time for course selection. Winds and percussion are added as needed to complete full symphonic instrumentation.

Having established a reputation for musical excellence, the orchestras take great pleasure in performing a wide variety of challenging music ranging from the traditional orchestral repertoire to some of today's most contemporary sounds. In addition to full orchestra, performance opportunities exist in various small ensembles including chamber orchestras and string quartets. Students who develop their playing skills to a high level may be invited to appear as a soloist.

COURSE NAME	D.F.	CREDIT
Freshman Orchestra (60260)	1.0	1.0

Freshman Orchestra is a class designed for all 9th graders entering the WAHS Orchestra program. Emphasis in this class is placed on the WAHS Orchestra essential learning outcomes through the study of modern and classical string orchestra literature. Students will focus on developing technical skills in bowing and left hand facility, as well as in music literacy and sight-reading. Students will use the Essential Techniques, book three. Participation in evening performances throughout the year (approximately one per term) is required. Advanced freshman may also audition for The Millionaire Strolling Strings.

COURSE NAME	D.F.	CREDIT
Concert Orchestra (60250)	1.2	1.0

The Concert Orchestra is open to all orchestra students in grades 10 through 12 and is designed to develop and expand upon fundamental technique and musicianship by exploring more challenging repertoire for the string ensemble. Emphasis is placed on developing independence as well as cultivating mastery of more advance technique such as 2 octave scales and refining vibrato. The Concert Orchestra would be a non-auditioned designed to offer a bridge between the Freshman Orchestra and Sinfonietta. The orchestra will highlight fundamentals of shifting to upper octaves on the instruments as well as refining vibrato and bowing techniques. The Students will use Book 4 of Sound Innovations. Participation in evening performances throughout the year (approximately one per term) is required. Concert Orchestra does combine with Sinfonietta for the Holiday Concert as well as the Pop-Tastik! concert.

COU	RSE NAME	D.F.	CREDIT
Sin	Sonietta/Symphony Orchestra (60230)	1.4	1.0

The Symphony Orchestra is committed to the excellent performance of great orchestral masterworks from the standard repertoire. The WAHS Symphony Orchestra makes numerous appearances throughout the year at local concerts, college campuses, as well as regional and national level adjudication festivals. The first quarter of the year is dedicated to the development of the "Millionaire Strolling Strings" show for that year as well as preparation of district orchestra solo repertoire. The student's willingness to spend extra hours in home practice is vital to gaining and maintaining membership in the group.

WAHS Bands

WAHS has three band offerings to meet the skills and interests of woodwind, brass and percussion instrumentalists. Concert performances throughout the year include Fall and Spring Concerts, an Annual Holiday Concert, the All-District Honors Concert and Festival participation. All students are expected to participate in rotating, large group lessons unless they are studying privately. Any student who has had experience performing on a band instrument is encouraged to participate. Placement auditions are held annually before the time for course selection. Winds and percussion are offered an opportunity to perform with the string orchestra on an as needed basis. Participation in the "Millionaire Football Band" is required for members of all three bands. Turn to the "Co-Curricular Activities" section of this catalog for a description of the 'Millionaire Football Band."

COURSE NAME	D.F.	CREDIT
Freshman Band (60190)	1.0	1.0

The purpose of the freshman band is to develop and refine the basic individual and ensemble skills that will permit them to pursue the finest in advanced band literature. This is an important year of musical growth and activity to help the students' bridge from the middle school to the high school ensemble. Ninth grade students wishing to participate in both instrumental and chorale ensembles will be scheduled into Performing Music. The students will be "shared" on a rotating basis by both the choral and instrumental teachers.

COURSE NAME	D.F.	CREDIT
Symphonic Band (60200)	1.2	1.0

Symphonic Band students have the opportunity to further develop their individual and group ensemble skills by preparing the best in traditional high school band literature. The ensemble enjoys the reputation of consistently achieving a high level of performance. Students wishing to participate in both instrumental and choral ensembles will be scheduled into Performing Music 10-12. The students will be "shared" on a rotating basis by both the choral and instrumental teachers.

COURSE NAME	D.F.	CREDIT
Wind Ensemble (60180)	1.4	1.0

The Wind Ensemble is designed to meet the needs of the more serious instrumental musician. The Wind Ensemble studies and performs some of the most demanding concert band literature written. The high standards of the ensemble require additional practice time by the individual students to maintain its consistent high quality of performance. The WAHS Wind Ensemble is truly the "pride" of the entire band program.

Music Electives

COURSE NAME	D.F.	CREDIT
Hip Hop, Rap, and Rock (6031X)	1.0	.50

The course studies the development of popular music in America. The students will receive instruction in the following: Experience the evolution of Hip Hop and Rap from the Bronx in the 1970's to today's current artists. Follow the development of Rock and Roll from 1950 through today. Students will use technology to further enhance their Hip Hop/Rap and Rock experience by developing beats and working with chord changes on a variety of programs and apps.

There are no prerequisite requirements

COURSE NAME	D.F.	CREDIT
Guitar S1/S2 (6035X)	1.0	.50

Guitar is designed for beginner through the accomplished player. This course will differentiate instruction to the student's abilities It will include intermediate picking and chording accompaniments, rock, folk, blues and classical styles of playing will be strongly emphasized. The reading of beginner and intermediate chord diagrams and music will be included.

There are no prerequisite requirements

Course can be taken twice.

COURSE NAME	D.F.	CREDIT
Basic String Technique (6045X)	1.0	.50

Basic String Technique will meet the needs of any high school student who has little or no experience on violin, viola, cello, or bass but is eager to learn. The class will take them from the very beginning skills and will culminate in a performance at the end of the year. This class will also prepare students to be involved in Concert Orchestra the following year. This is the perfect course if a student drops out of orchestra in the elementary-middle school or always regretted not signing up in earlier grades.

COURSE NAME	D.F.	CREDIT
Wind, Brass and Percussion Basics (6046X)	1.0	.50

Wind, Brass and Percussion Basics will meet the needs of any high school student who has little or no experience on wind, brass or percussion instruments, but is eager to learn. The class would take them from the very beginning skills and would culminate in a performance at the end of the year. This class will also prepare students to be involved in the Symphonic Band the following year. This is the perfect course if a student drops out of band in the elementary-middle school or always regretted not signing up in earlier grades.

COURSE NAME	D.F.	CREDIT
AP Music Theory (60010)	1.45	1.0

AP Music Theory seeks to develop a thorough grasp of the fundamentals of music through the study of scales, intervals keys and triads, leading to the writing of simple four-part harmonization. Strong emphasis is placed on ear-training and the improvement of music reading. This course will prove most beneficial to those planning to follow a career in music or music education. Other pupils who want to acquire a good basic musical knowledge would find this course very helpful.

Music Theory AP moves at an accelerated rate and is designed to prepare students for the AP Music Theory Exam. Students are encouraged to take the AP exam

Prerequisite(s): Recommendation of Theory Instructor based on previous music background

Pi	ano Keyboarding S1/S2(6003X)	1.0	.50
CO	DURSE NAME	D.F.	CREDIT

Do you want to impress family and friends with a song other than Heart and Soul or Chopsticks? Do you know that 70% of adults wish they learned to play piano? This beginning group piano class is for students with little or no playing experience. Time will be spent on and off the keyboards. The course will include basic music reading skills and progress from simple to intermediate piano playing. Students will receive daily group instruction as well as weekly individual lessons. Throughout the semester, all students will be able to perform individually and in a group ensemble. By the end of the course, students should master the basic techniques of piano performance and be able to play music from classical to popular genres of music.

There are no prerequisite requirements

Course can be taken twice.

COURSE NAME	D.F.	CREDIT
Music Mogul (6004X)	1.0	.50

Are you the next P-Diddy, Russell Simmons, J-Z or Tim McGraw? Music Mogul is an introductory class to the music business; students will experience many facets of the music business to include: that of Artist, Producer and Audio Engineer where the student will create and perform songs by using Presonus Studio-One Digital Audio Software and interface; Promotion and Management, where the student will be responsible to organize a release party and a 30 second commercial to promote their newly created song. So, if you wish to create music: Rap, Dubstep, Soul, Pop, Country, Raga, Club music or even Appalachian dulcimer music, consider Music Mogul.

There are no prerequisite requirements

Course Descriptions: Drama and TV Production

COURSE NAME	D.F.	CREDIT
Drama I (00711)	1.0	.50

Drama I is an activity-oriented course that offers an introductory look at the fascinating world of theater. The course includes improvisation; pantomime, voice development, stage etiquette and basic play production. Through participation, students will have opportunities to increase their abilities to observe, to imagine, to respond, and to develop both body and vocal expression in an open, supportive environment. Enrollment will be limited if demand exceeds available resources.

COURSE NAME	D.F.	CREDIT
Drama II (00722)	1.0	.50

Drama II is an exciting continuation of the creative dramatic work introduced in Drama I. Students will explore the "play" from various perspectives. Activities will include advanced character development, specific acting techniques, play writing, directing, and technical theater. The "hands-on" approach of this class builds responsibility and maturity in students as they grow in their understanding and appreciation of theater.

Enrollment will be limited if demand exceeds available resources.

Prerequisite(s): Successful completion of Drama I

COURSE NAME	D.F.	CREDIT
Drama III (00731)	1.2	.50

This semester course in drama encourages students to explore and practice technical theatre as well as performance. Students will engage in scriptwriting and advanced acting techniques as well as set design and construction. Because this course will work within an applied theatre arts framework, students will explore careers requirements for various theatre technicians. Students will also practice skills needed for careers in Broadcast Journalism through their involvement in the production of the school radio show. Enrollment is limited to students in 10th, 11th, or 12th grade.

Prerequisite(s): Drama II (with an average of 85% or better in Drama II) and recommendation of drama teacher.

COURSE NAME	D.F.	CREDIT
Drama IV (00742)	1.2	.50

This semester course in drama builds on Drama III and continues to develop skills in scriptwriting, directing, acting and producing for both "reader's theatre" and traditional productions. Students will also be actively involved in the videotaping and editing of a dramatic piece for their portfolios. As well as preparing for a career in the theatre, students will continue their work on the school radio show.

Enrollment is limited to students in 10th, 11th, or 12th grade.

Prerequisite(s): Drama III (with an average of 85% or better in Drama III).

COURSE NAME	D.F.	CREDIT
Drama Studio (00760)	1.2	1.0

Course Description

Drama Studio builds on the skills, knowledge and activities of Drama 1-4 and provides students with the arena to prepare, produce and perform in more extensive productions. Activities would include writing and producing published and original plays, scenes and monologues. Opportunities will also include all aspects of performance and technical theater. Writing and the study of drama history will be integrated components of the class. Public performance beyond the school day is a requirement of the class.

Prerequisite(s): Successful completion of Drama 1-4

COURSE NAME	D.F.	CREDIT

Television Production (00750)

1.2

1.0

The Television Production course introduces students to all phases and aspects of video production in a studio setting. Topics covered include: camera operations, field and studio production, directing, programming, script writing, lighting, editing, and a total overview of the television industry. The design of the course emphasizes hands-on experience where students train on professional studio equipment creating a variety of video projects including the daily announcements. Attendance at productions outside of the regular school day is a requirement of this class.

Prerequisite(s): Enrollment is limited to students in 10th, 11th, or 12th grade who have successfully completed a drama course or recommendation of drama teacher.

Course Descriptions: Visual Arts

The Visual Art Department offers three discipline focus tracks: Two-Dimensional (Drawing, Painting, Printmaking), Three-Dimensional (Clay, Sculpture, Jewelry), and Photography & Digital Media. In each track, students will develop artistic literacy by creating, presenting, responding to and connecting with visual works of art. Students may take the courses as a means of expression and communication or with a drive to develop and refine artistic skills. We aim to provide opportunities for creative and critical thinking and build a foundation of 21st Century skills that carry over into other academic disciplines. Prerequisites must be met for advanced, Advanced Placement and independent study courses.

COURSE NAME	D.F.	CREDIT
Drawing (7002X)	1.0	0.50

Students will develop drawing skills with a variety of experiences in two-dimensional media. Various methods and materials (such as graphite, charcoal, ink, and painting) will be explored. Grounded in the Elements and Principles of Art and Design, a range of drawing concepts will be covered including but not limited to composition, value range, and color theory. Emphasis is placed on the development of observational and technical rendering skills.

Prerequisite(s): None

COURSE NAME	D.F.	CREDIT
Painting and 2D Design (7003X)	1.0	0.50

Students will develop painting skills with a variety of experiences in two-dimensional media. Various methods and materials (such as watercolor, acrylic, ink and printmaking techniques) will be explored. Grounded in the Elements and Principles of Art and Design, a range of painting concepts will be covered including but not limited to composition, color theory, and process. Emphasis is placed on creative expression and the exploration of media.

Prerequisite(s): None

COURSE NAME	D.F.	CREDIT
Mindful Art (7004X)	1.1	0.50

Students will approach painting, drawing, and 3-Dimensional processes of creating with a foundation in mindfulness. Anxiety-reducing and stress-reducing strategies will be incorporated, explored, and practiced through visual art experiences. This course will merge the creative visual process with mindfulness practice and is open to all students. No previous art experience required.

Prerequisite(s): None

COURSE NAME	D.F.	CREDIT
Two-Dimensional 2D Visual Arts (71530)	1.2	1.0

Students will further develop skills in a variety of two-dimensional media. Various methods and materials (such as graphite, charcoal, ink, painting and printmaking) will be explored. A range of advanced two-dimensional concepts will be covered including composition, color theory and portfolio development. Emphasis is placed on the development of observational and technical skills needed for image making.

Prerequisite(s): Painting and Drawing and/or instructor approval

COURSE NAME	D.F.	CREDIT
-------------	------	--------

Advanced Two-Dimensional 2D Visual Art (70050)

1.3

1.0

Students will explore a variety of two-dimensional media including: sketchbooks, advanced drawing, advanced painting and advanced printmaking skills and techniques. Portfolio preparation is a focus of the class.

Prerequisite(s): Instructor Recommendation (portfolio review) Course can be taken more than once.

COURSE NAME Introduction to Sculpture, Ceramics, and Craft (70060)

D.F. CREDIT 1.1 0.5

Introduction to Sculpture, Ceramics, and Craft is designed as an overview course focusing on the exploration of 3-Dimensional media. Safe and proper handling of tools and materials will be practiced. Emphasis will be placed on the Elements and Principles of Design, sketchbooks, drawing, pottery/ceramics, sculpting, and crafts.

Prerequisite(s): None

COURSE NAME

Advanced Sculpture (70101X)

D.F. CREDIT

1.3 0.5

Extensive studio experiences with sculpture will be accompanied by opportunities to gain further understanding about why we make art, how to interpret art works, and the influences of history on art. Students will explore a variety of three-dimensional and sculptural media.

Prerequisite(s): Introduction to Sculpture, Ceramics and Craft

COURSE NAME D.F. CREDIT Advanced Ceramics (7008X) 1.3 0.5

Extensive studio experiences with ceramics will be accompanied by opportunities to gain further understanding about why we make art, how to interpret art works, and the influences of history on art. Students will explore a variety ceramic materials, techniques, and processes.

Prerequisite(s): Introduction to Sculpture and Ceramics and Craft

COURSE NAME Advanced Stained Glass (7009X) D.F. CREDIT 0.5

Extensive studio experiences with stained glass will be accompanied by opportunities to gain further understanding about why we make art, how to interpret art works, and the influences of history on art. Students will explore a variety materials, techniques, and processes related to stained glass.

Prerequisite(s): Introduction to Sculpture, Ceramics, and Craft

COURSE NAME Advanced Jewelry (7010X) D.F. CREDIT 0.5

Extensive studio experiences with jewelry will be accompanied by opportunities to gain further understanding about why we make art, how to interpret art works, and the influences of history on art. Students will explore a variety materials, techniques, and processes related to jewelry.

Prerequisite(s): Introduction to Sculpture, Ceramics, and Craft

COURSE NAME	D.F.	CREDIT
Introduction to Photography & Digital Media (71650)	1.1	1.0

Introduction to Photography & Digital Media is a general course in digital photo and image creation. Through this course, students will gain hands-on experience with manual DSLR cameras to develop their technical & creative skills. Students will develop an understanding of techniques for creating compelling photographs and meaningful images, such as composition, lighting, as well as how to use the Elements of Art & Principles of Design to take their photos to the next level. Students will explore digital process techniques & photo editing, using software such as Photoshop.

Prerequisite(s): None

COURSE NAME	D.F.	CREDIT
Animation (7011X)	1.2	0.5

The Animation art course is designed to give students exposure to a wide range of animation techniques both traditional & digital. Concepts such as cell animation, stop motion, Claymation, as well as 2D & 3D computer generated animation will be explored. Students will learn about the historical & cultural evolution of animation & develop their skills in the areas of character design, storytelling, & creating the illusion of movement.

Prerequisite(s): Intro to Photo or Digital Media Instructor Recommendation (portfolio review)

COURSE NAME	D.F.	CREDIT
Film & Video (7012X)	1.3	0.5

The Film & Video art course is a semester long class on video creation & film history. Students will utilize DSLR cameras & professional editing software to explore filmmaking in non-fiction & fiction genres such as documentary, music video, and short film.

Prerequisite(s): Intro to Photo or Digital Media Instructor Recommendation (portfolio review)

COURSE NAME	D.F.	CREDIT
Advanced Animation (70102X)	1.3	0.5

Students in Advanced Animation will continue building on the skills learned in Animation, utilizing the Principles of Animation and traditional and digital 2D and 3D processes to further develop their animation portfolio. Students will learn the concepts of cell painting, walk cycles and lip syncing, as well as, more about the historical and cultural evolution of animation. Students in Advanced Animation will continue to develop their skills in the areas of character design, storytelling, and creating the illusion of movement.

Prerequisite(s): Animation

COURSE NAME	D.F.	CREDIT
Advanced Photography and Digital Media (70140)	1.3	1.0

Students will explore a variety of photography and digital media techniques, including: sketchbooks, advanced traditional and digital photography methods, digital design and composition, still and moving images. Portfolio preparation is a focus of the class.

Prerequisite(s): Intro to Photo & Digital Media, or Instructor Recommendation (portfolio review) Course can be taken more than once.

COURSE NAME	D.F.	CREDIT
AP 2D Studio Art (71480)	1.45	1.0

The AP 2D Studio art course is for students interested in a rigorous and focused study in 2D art. Students will develop a quality portfolio that demonstrates a mastery of concept, composition and execution in 2D design. AP 2D Studio is not based on a written examination; instead, students submit portfolios (to a national board) for evaluation at the end of the year. The portfolio will demonstrate quality, concentration and breadth. As in any college level course, students will be expected to spend a considerable amount of time outside of class in order to complete assignments, including summer assignments.

Prerequisite(s): Recommendation of AP Studio Instructor based on previous art background.

Students enrolled in this course are expected to submit an advanced placement portfolio.

COURSE NAME	D.F.	CREDIT
AP 3D Studio Art (71670)	1.45	1.0

The AP 3D Studio art course is for students interested in a rigorous and focused study in 3D art. Students will develop a quality portfolio that demonstrates a mastery of concept, composition and execution in 3D design. AP 3D Studio is not based on a written examination; instead, students submit portfolios (to a national board) for evaluation at the end of the year. The portfolio will demonstrate quality, concentration and breadth. As in any college level course, students will be expected to spend a considerable amount of time outside of class in order to complete assignments, including summer assignments.

Prerequisite(s): Recommendation of AP Studio Instructor based on previous art background.

Students enrolled in this course are expected to submit an advanced placement portfolio.

COURSE NAME	D.F.	CREDIT
AP Art History (71470)	1.45	1.0

The AP Art History course welcomes students into the global art world to engage with its forms and content, as they research, discuss, read, and write about art, artists, art making, and responses to and interpretations of art. By investigating specific course content of 250 works of art characterized by diverse artistic traditions from prehistory to the present, the students develop in-depth, holistic understanding of the history of art from a global perspective. Students learn and apply skills of visual, contextual, and comparative analysis to engage with a variety of art forms, developing understanding of individual works and interconnections across history.

Prerequisite(s): Recommended for students who have been successful in humanities courses such as history and literature, or in studio art courses, are especially encouraged to enroll.

Students enrolled in this course are expected to take the Advanced Placement Examination.

COURSE NAME	D.F.	CREDIT
Art Studio Independent Study (71500)	1.3	0.5

This Studio Art course is designed for junior and senior art students who have completed the Introduction through Level IV in a 2D, 3D, or PDM track. Students will focus on portfolio preparation and developing work series for exhibition. Will include visual journaling, proper studio maintenance, independent and collaborative project proposals.

Prerequisite(s): Recommendation of Art Instructor based on previous art background. Course can be taken more than once.

Course Requirements Health and Physical Education Department

Health and Physical Education Department

It is a graduation requirement that each student is required to complete the prerequisite semester of Physical Education 01 and successfully complete Health 01. After completion of those requirements they must complete EITHER an additional Physical Education course (PHYS ED 03, 04, 05, 06) or Health 02.

After these requirements are met a student is encouraged to take additional Physical Education or Health Education courses as an elective.

Course Descriptions: Physical & Health Education

Physical Education Philosophy

To prepare all students with a variety of movement experiences that will lead to an active and healthy life. **Overview**

Physical Education (PE) contributes to the physical, intellectual, social and emotional well-being of the student. Our curriculum is devoted to purposeful instruction in progressive activities to promote a positive self-concept through fitness, sport, and lifetime recreational pursuits. Each student is able to achieve success according to his/her ability. Participation and involvement are required at all levels. Health related fitness is the goal for all students. The curriculum intent is to provide students of all abilities and interests with a variety of movement experiences that will lead to an active and healthy life. Activities are taught in a coeducational environment. Students needing adapted physical education are scheduled into a program tailored to their needs.

COURSE NAME	D.F.	CREDIT
PERSONAL FITNESS/BASIC AQUATICS (PE01) (9091X)	1.0	.50

Physical Education 01 is designed for 9th and 10th grade students as a fundamental course that serves as a prerequisite for the remainder of the Physical Education course offers. Students will be introduced to a variety of activities including team and individual sports. This course focuses on the understanding and implementation of personal fitness concepts. Strength training, aerobic conditioning, and functional training are improved through daily training and assessed using a variety of fitness tests. Finally, the course will allow students to become proficient in aquatics skills. An emphasis is placed on execution of basic swimming strokes, open water survival, and diving. (Fitness Walking, Jogging, Functional Training/Flexibility and Fitness Testing, Core Strengthening, Plyometrics, Soccer, Tennis, Table Tennis, Strength Training, Flag Football, Speedball, Beginning and Advanced Swimming Strokes, Water Aerobics, Aerobic Swimming, Concepts of Physical Fitness, Team Handball, Badminton, Diving, Circuit Training) Concepts will be reinforced through appropriate content reading and writing.

COURSE NAME	D.F.	CREDIT
PHYSICAL FITNESS AND BODY COMPOSITION (PE03) (9093X)	1.0	.50

The Physical Fitness and Body Composition course will build on the fitness principles developed in Physical Education 01. The objectives of Physical Education 03 are for the student to achieve and maintain a health-enhancing level of physical fitness and exhibit responsible personal and social behavior that respects self and others in physical activity settings. Instruction will include both personal and group fitness training. Cardiovascular/aerobic training, body composition intervention, explanation of resistance training methods and techniques, principles of healthy nutrition choices and safety factors will be emphasized. Group fitness training such as circuit and interval training, step and floor aerobics, stability ball exercises, abdominal/core exercises, resistance bands, hand weights, jump ropes, Pilates techniques, yoga/flexibility workouts, kick boxing aerobics, hip hop aerobics, basic dance techniques are examples of activities that will be incorporated for a full body workout that sculpts and tones the body, build cardiovascular endurance and burn calories. Principles of nutritional concepts will be combined with sound fitness training models. This course will provide the knowledge and skills necessary to make positive lifelong fitness choices.

COURSE NAME	D.F.	CREDIT
LIFETIME/ RECREATIONAL ACTIVITIES (PE04) (9094X)	1.0	.50

Students will build and develop skills and strategies that were introduced in Physical Education 01 that are associated with individual, dual and lifetime activities. The course identifies and emphasizes activities that can be implemented into an individual's continual pursuit toward healthy living across a lifetime. Probable

units of instruction include but are not limited to the following: badminton, canoeing, fitness walking/jogging, golf, pickleball, table tennis, tennis, fitness training, volleyball and water games, and Ultimate Frisbee. Concepts will be reinforced through appropriate content reading and writing.

COURSE NAME	D.F.	CREDIT
TEAM SPORTS (PE05) (9095X)	1.0	.50

Based on the knowledge and skills gained from Physical Education 01, students will continue to develop techniques, skills, and strategies that are associated with a team sport activity. The emphasis is on the team concept and self-refereeing/regulating a team game cooperatively with other students. Probable units of instruction include but are not limited to the following: basketball, flag football, lacrosse, soccer, softball, speedball, team handball, Ultimate Frisbee, volleyball, water polo/water games, aerobic ball, Tchoukball, Eclipse Ball, floor hockey, cooperative games. Concepts will be reinforced through appropriate content reading and writing.

COURSE NAME	D.F.	CREDIT
PERSONAL FITNESS AND CONDITIONING (PE06) (9096X)	1.0	.50

Students will review fitness topics and concepts that were introduced in Physical Education 01. New concepts of fitness training and exercises will be explored in order to build the foundation necessary to design and implement a personal fitness and strength program. A variety of fitness activities will be practiced and performed in venues besides the WAHS weight room throughout the semester; including the swimming pool. Basic human anatomy, fitness safety, proper training form and technique will be stressed in this course. Students will also utilize fitness equipment such as free weights, machine weights, kettle bells, body bars, dumbbells, stability balls, and resistance bands in addition to other bodyweight, plyometric, and agility training activities. Training activities include fitness walking, step aerobics, jogging, yoga, aquatic conditioning, and Pilates, which will round out the content of this course. Student progress will be monitored with a selection of fitness tests and evaluations while reinforcing these concepts through appropriate content reading and writing activities.

Health Education Philosophy

Provide all students with the skills and knowledge to consistently practice behaviors that promote lifelong health and well-being, to use quality health care services effectively, and to promote the health of others, the community and environment.

Overview

The Williamsport Area High School's comprehensive health education curriculum teaches students the functional knowledge and skills needed to promote health and prevent disease. The curricular assessment framework was developed from the coordination of the Pennsylvania State Standards, the National Health Education Standards and the Health Education Assessment Project. Our goal is for students to become health literate so they can think through and make healthy choices in solving their own problems, be responsible and make choices that benefit themselves and others, use communication skills in clear and respectful ways and be in charge of accessing valid health information.

COURSE NAME	D.F.	CREDIT
Health Enhancing Behaviors and Risk Reduction (Health 01) (9085X)	1.0	.50

A course encompassing many topics important to teenagers as identified by the CDC's Six Adolescent Risk Behaviors: alcohol and drug use, injury and violence, tobacco use, nutrition, physical activity, and sexual behaviors. The course topics include: Nutrition, Drug & Alcohol, Human Sexuality, and Violence Prevention and Wellness and Consumer and Personal Health. A strong emphasis will be placed on the goal setting and decision making skills.

Nutrition

Students will analyze factors that impact nutritional choices and assess their diets to develop plans for improvement. Other nutrition topics include: eating disorders, fad diets, fast food analysis, portion sizes and nutrition labels.

Drug & Alcohol

Students will explore current trends in drug and alcohol use. They will analyze prevention, intervention and treatment strategies in relation to adolescent and adult drug use. Analyzing influences, interpersonal communication, decision making and goal setting skills will be implemented and practiced.

Human Sexuality

In this unit, students will understand human anatomy and reproduction. They will also learn how to apply protective/preventative strategies related to teen pregnancy and sexually transmitted infections. Teen relationships/dating and decision-making skills will be explored.

Violence Prevention

Students will analyze and apply strategies to avoid or manage conflict and violence during adolescence. They will learn how to practice using decision-making strategies to solve problems, analyze influences, practice goal setting, demonstrate interpersonal communication skills, access information and advocate for non-violent outcomes when solving conflicts.

Wellness and Consumer & Personal Health

Students will explore the relationship between health and wellness. There is a connection between lifestyle choices and lifestyle diseases that students will examine as well as listing health habits that they can adopt to maximize their wellness. Students will learn how goal setting, motivation, and personal choice can improve health and prevent disease. Also included are healthy consumer choices, health care provider services, and health related information and products

COURSE NAME	D.F.	CREDIT
Personal, Family and Community Health (Health 02)(9086X)	1.0	.50

This class builds sequentially from the content in Health 01. A variety of topics identified by the CDC's Adolescent Health Risk Behaviors as current issues facing teen and adult health will be included. These topics include: Stress Management, First Aid & CPR/AED, Family Living, Current Health Topics, and an exploration of skills to prepare students who are interested in health related careers. A variety of teaching techniques will be

used which involve maximum participation by the student. There will be a concentrated focus on the following skills: core concepts, accessing valid health information, analyzing influences, interpersonal communication, self-management, goal setting, decision making, and advocacy.

Stress Management

This is an insightful unit in which students will reflect upon themselves and identify their stressors, signs of stress and positive ways to cope with stress. Students will describe how the nervous, hormonal, and immune systems respond to stress. They will also practice relaxation techniques to help manage stress.

First Aid & CPR/AED

Students will be trained and offered certification through the American Red Cross Adult CPR/AED and Standard First Aid courses taught by health teachers at the high school who are authorized instructors. Upon successful completion of the required written and skill-based testing, students may purchase their certification cards issued by the American Red Cross. Regardless of purchasing the certification cards, all students will receive the content and skills for certification.

Family Living

This unit builds upon students' existing knowledge of human sexuality, including anatomy, reproduction, and protective/preventative strategies related to teen pregnancy and sexually transmitted infections. In addition, students will study the process of pregnancy and birth. They will discuss the responsibilities of being a parent and evaluate their goals and decisions for a healthy and productive future. Goal Setting skills will encourage realistic strategies towards becoming a healthy sexual adult.

Current Health Topics

The focus will be improving health literacy. Current Health Topics will be explored along with skills to prepare students who are interested in health related careers. A variety of teaching techniques will be used which involve maximum participation by the student. There will be a concentrated focus on the following skills: core concepts, accessing valid health information, analyzing influences, interpersonal communication, self-management, goal setting, decision making, and advocacy.

Prerequisite(s): Must achieve a passing grade of 70% or above in Health 01

SPECIAL EDUCATION

The Williamsport Area High School is committed to educating all students, including those with significant disabilities, in the Least Restrictive Environment. The high school offers a continuum of special education supports and services to meet the diverse needs of exceptional students. Special education services available at the high school include Learning Support, Emotional Support, Life Skills Support, Speech/Language Support,

Hearing Support, Vision Support, and Autistic Support. In addition, BLaST Intermediate Unit #17 operates a Multiple Disabilities Support program for students with significant disabilities.

The high school is committed to educating students with disabilities with non-disabled peers in the regular education environment to the maximum extent appropriate. To accomplish this objective, the high school supports the implementation of effective inclusive practices for all students. Through the collaborative effort among regular education and special education personnel, co-teaching classes have been established in many core content areas. The high school will continue to enhance its inclusive practices by providing on-going professional development.

The final determination of educational services for exceptional students will be dependent upon the identified needs of the students as determined by the IEP team. A continuum of services is available to meet the diverse needs of all students including, but not limited to, the following: Regular Education with Consultation from Special Education, Regular Education with Consultation and Accommodations, Regular Education with direct Special Education support within the classroom, Regular Education with direct Special Education support outside the classroom, and separate Special Education classes outside of Regular Education.

An Individualized Education Plan (IEP) is developed by the IEP team, including parents, to meet the individual strengths and needs of all exceptional students. When determining how to best meet a student's goals and objectives, the IEP team begins with a discussion of supports within the regular education environment. The IEP team will review the necessary Supplementary Aids and Services needed to enable the exceptional student to participate in regular education programs to the maximum extent appropriate. Only after the IEP team has determined that success in the regular education program is not possible will it discuss placement in a more restrictive environment.

The Williamsport Area High School supports comprehensive transition planning for students with disabilities to prepare them for post-school outcomes. The district offers a community based work program for high school students, with transportation provided to various training sites such as the local hospital, hotels, and several area businesses. Students in the high school Life Skills and Autistic Support classes participate in an instructional academic program based on the Pennsylvania Alternative Academic Standards, as well as a functional curriculum that includes a strong independent living component, prevocational skills, and a supervised work training experience.

The Williamsport Area High School employs a highly qualified special education staff that is committed to helping exceptional students achieve their maximum potential. Currently, the high school employs 23 special education teachers, an itinerant hearing support teacher, and a Transition Coordinator. All special education teachers participate in ongoing professional development trainings regarding IEP development, progress monitoring, and legal issues in special education. Select special education teachers have also been trained in a variety of specific instructional intervention programs, as well as non-violent crisis intervention and social skills instruction. Related service providers from the BLaST IU#17 include a speech/language therapist, behavior consultants, and a vision specialist. Occupational therapy and physical therapy is provided through HOPE/CDC. In addition, the high school employs several instructional aides and personal care assistants who provide additional supports and services for exceptional students. All support staff also participate in annual professional development activities related to the students whom they service.

Williamsport Area High School Non-Discrimination Policy

The Williamsport Area School District is an equal opportunity education institution and will not discriminate on the basis of race, color, national origin, sex and handicap in its activities programs, or employment practices as required by

Title VI of the Civil Rights Act of 1964, Title IX Education Amendment of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disability Act of 1990.

For information regarding civil rights or grievance procedures, services, activities, and facilities that are accessible to and useable by handicapped individuals, contact:

Anne Logue, Human Resources Director, Williamsport Area School District

2780 West Fourth Street, Williamsport, PA 17701 Phone: (570) 327-5500
